OB Product Proposal.docx (0.8MB)

2

Hello Team! This is Gentry Jenkins (the tall guy). I just wanted to send you the product proposal for the project we are working on. Most of the information in the report is about the implementation of the actual product itself and has very little to do with the project we need to work on, but should give you all an idea of the product. The part we need to work on will be a database that keeps track of owners, warranty information, and any other information we deem needed. For now, the core of the project will be getting user input, putting a number to that name, and storing the information for recall. The rest will be user interface and extras. We will have to choose the format, downloadable program or webpage, which will make us choose a language. Thanks for reading here is the file.

SEP 10, 8:02 PM

Gentry

Also just read this again, "The factory assigns a serial number of the tags or the user can write specific data into the tag [7]." someone said something about personalizing the chip, it looks like that is a possibility. Talk to you all tomorrow.

Christopher Guerra

1

Awesome, I'll check this out asap

SEP 14, 6:10 PM

Gentry

1

everybody ok doing this project in Java?

SEP 14, 6:43 PM

Junior

1

I'm ok working with Java.

SEP 14, 6:44 PM

Christopher Guerra

1

Yeah perfectly fine with me

SEP 15, 12:26 PM

Gentry

doing the group report (although everyone has to turn in a version) and i need to put everyone's name and ID # on the report. Help me out by putting them here.

Gentry Jenkins glj180000

anyone have any knowledge of any frameworks that might save us time. Otherwise, im looking into one.

SEP 15, 2:55 PM

Labeeba

1

Labeeba Rana Ifr160130

I already had my own report written for a different idea, but will probably join y'all for the group project!

Christopher Guerra

Does he have a rubric or any specific criteria up on elearning for the report?

Labeeba

Yes it's in the PowerPoint for one of the lectures

Lecture 4 I believe

Christopher Guerra

Cool, thank you!

SEP 15, 5:19 PM

Gentry

I have finished my report. IT IS A READ!!!! it is an expansion of the last report i sent you guys. I will send it on here after i turn it in. Still waiting on 2 ID Numbers.

My Group proposal

New Project Proposal.docx (1.1MB)

SEP 16, 6:32 PM

Christopher Guerra

@Labeeba Did you do something different for your proposal

SEP 16, 6:38 PM

Gentry

A bit, its insanely long 10 pages with references, pictures and charts. It's not only a programming proposal but a project and product proposal.

And I put all your names on it.

Labeeba

2

Yes I submitted something diff cause I had my proposal before this team formed. But I'm going to join y'all for the group so please make sure my name stays on the final report due this Friday!

SEP 16, 6:40 PM

Christopher Guerra

Alrighty

1

Looks really good Gentry!

Gentry

Thanks didnt catch you were talking to her lol

Christopher Guerra

1

A few people in the group want to see your idea by the way Labeeba
All good lol

Gentry

I'm open to what ever if someone has something.

Labeeba

3

My idea might be too big for the scope of this project, but I'll send it to y'all ASAP! It's basically an app to use during natural disaster to request for water, food, medical attention

SEP 16, 7:16 PM

Gentry

Is there not something for that currently?

Labeeba

1

The most popular pre-disaster preparedness app zello is essentially a walkie talkie whereas this app would cut that process/time in half

Gentry

And I assume be in some way more functional than 911?

SEP 16, 7:54 PM

Labeeba

Yes!

But we actually have to code this project right?

Like for our class

SEP 16, 8:13 PM

Gentry

Yea, it needs to be a working product. But we can use frameworks or libraries.

Labeeba

In that case I would suggest we stick to your idea

SEP 18, 5:38 PM

Gentry

1

hey guys just wanted to reach out, feel free to look over other peoples proposals. If you would rather be on any other project I just want everyone to be where they want to be.

Otherwise, I will turn in the group project with EVERYONE's name and ID on it.

SEP 18, 6:06 PM

Varika

1

just submit it anyway because the prof picks the one he thinks is most feasible and fits the criteria we need to work on? at least that's what I thought

SEP 21, 8:00 PM

Varika

Hey guys anyone know about this quiz? In announcements a quiz about test coverage can't find it

Sindhura Boppudi

1

Yea it's in the slides

SEP 22, 6:09 PM

Junior

1

Hey guys do you know which lecture has the quiz details?

SEP 22, 6:54 PM

Junior

Has anybody done this quiz?

Christopher Guerra

Not yet

SEP 22, 7:10 PM

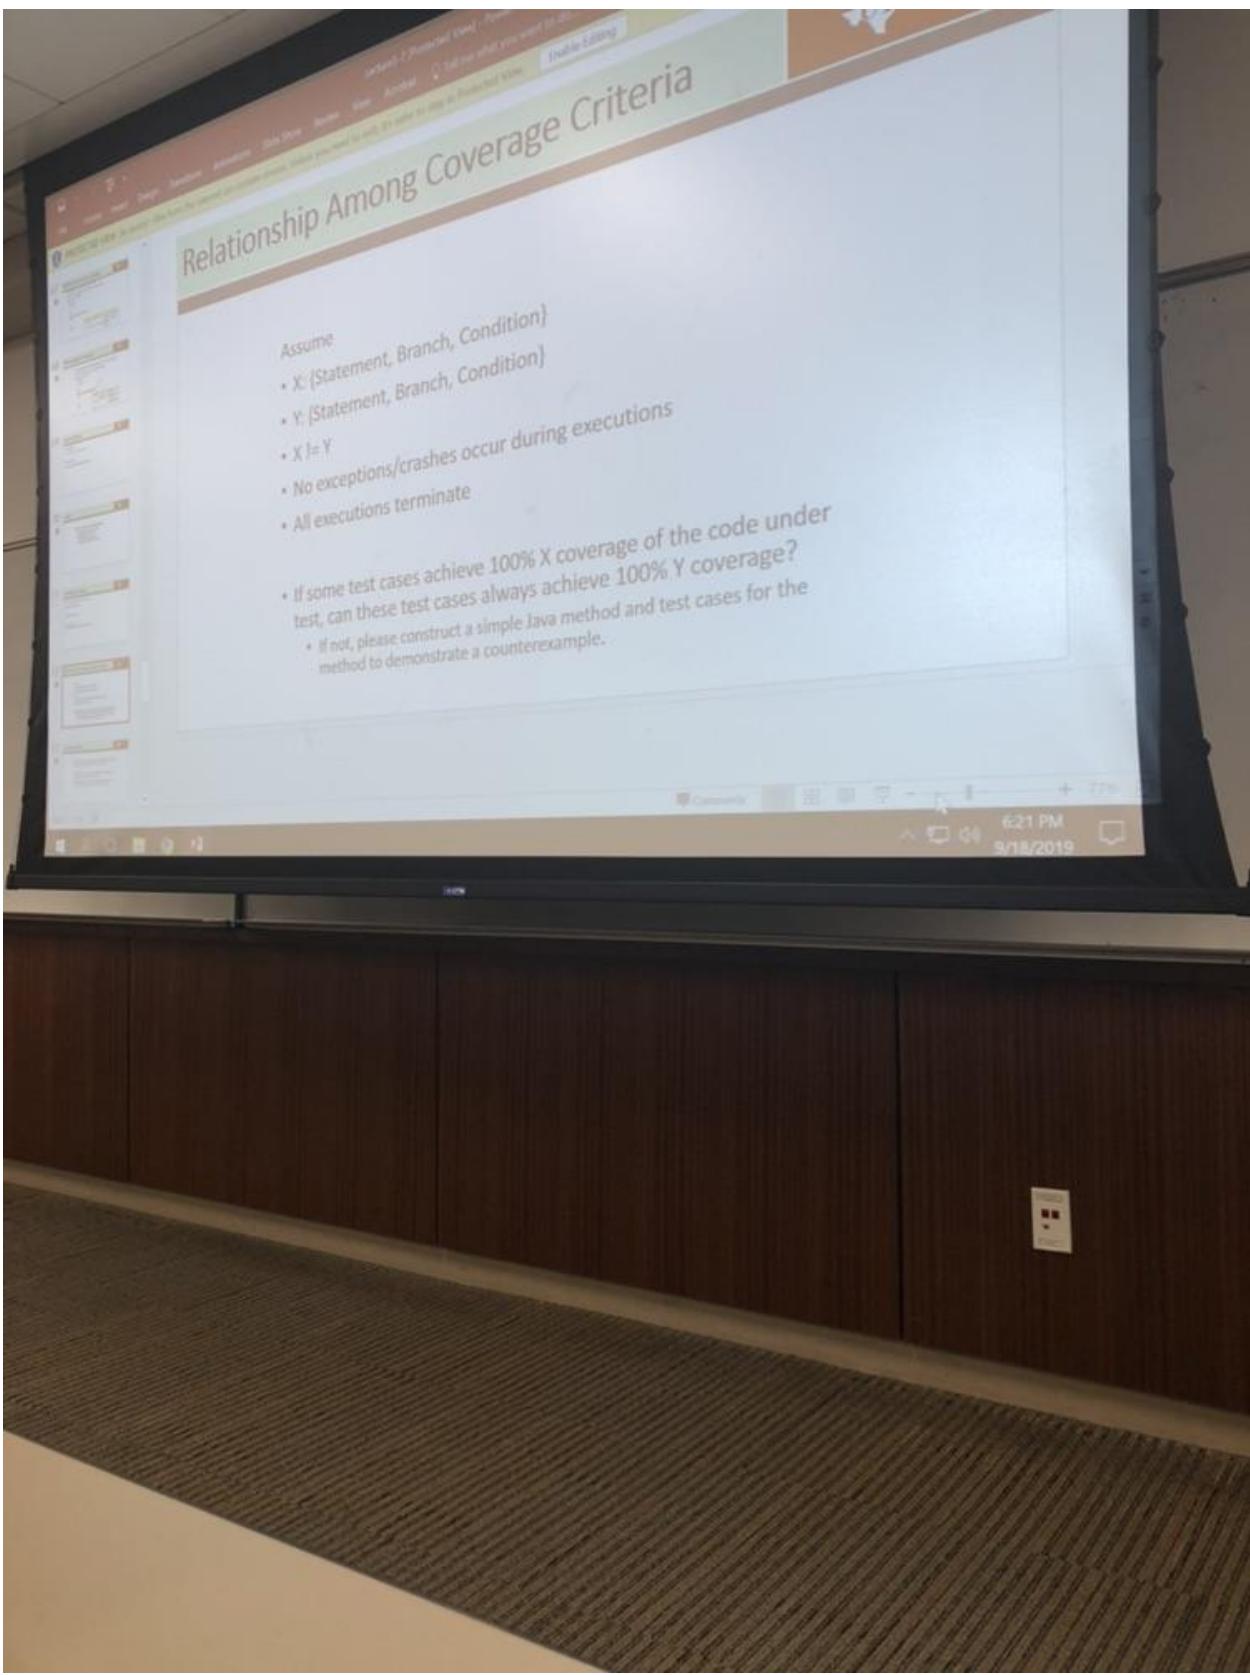

Junior

Have you found it in the slides? If yes, which lecture and what page(s)?

Labeeba

Not super clear but hope this helps!

SEP 22, 7:36 PM

Junior

Just this page?

Labeeba

These are just the requirements

Junior

Okay.

SEP 29, 3:07 PM

Varika

Do we have homework for this class so far? It's on the syllabus but idk if it's been assigned?

When do we get to know if the projects been approved

Gentry

No homework besides the first one, one quiz so far. I'll ask the teach tomorrow about when we can start. I'm right there with you.

Varika

Besides the first one? There was hw?

Gentry

Wasnt there a "send me an email that sais I took the prerequisite"?

Computer science department pre-requisite verification form

SEP 29, 3:38 PM

Varika

Oh that gotcha

SEP 30, 4:57 PM

Gentry

Can somebody please ask him about the project tonight I can't make it to class and I need to know

OCT 1, 12:15 PM

Noman Syed

Yes i asked him

1

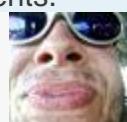

He said we can start with requirements and stuff

OCT 1, 12:22 PM

Gentry

I'm sorry what do you mean by requirements.

Christopher Guerra

Just like what we need to get the project done

1

Like start a github repository

OCT 1, 12:24 PM

Christopher Guerra

And I guess prep for any sort of coding we're gonna do

Did he say we're going to have to list all of these out?

Gentry

I'm on github, I'll look it over when I get home. But to be clear he hasn't picked our project yet so we don't know what we are doing yet correct?

Christopher Guerra

He said the TA should be going over some stuff with us about that next class I think
I guess we should just set up github since that's definitely going to be used
I recommend ya'll download atom and github desktop too if you don't have them

Noman Syed

Do they have that for Mac

Christopher Guerra

1

Yeah

OCT 2, 11:34 AM

Varika

Hey so I have github and atom already if there's anything else u guys let me know please
won't be in class or on campus today

OCT 2, 11:57 AM

Gentry

Me either I am still out of town be back ready to put in work tomorrow

OCT 2, 5:53 PM

Sindhura Boppudi

Has everyone gone over the 3 projects that came from members of our group? We can take a vote to see which one we want to do and then just tell the Professor and TA

OCT 2, 7:30 PM

Sindhura Boppudi

New Project Proposal.docx (1.1MB)

Project Proposal(1).docx (0.1MB)

Project Proposal(3).docx (0.1MB)

Which project?

Total votes: 2

Voting has ended

[View results](#)

OCT 2, 8:45 PM

Gentry

I thought he had to approve?

In any case I want to do the easiest I'm doing 18 hours lol. I'll look then over in the morning

Poll 'Which project?' is about to expire

Poll 'Which project?' has expired

OCT 5, 10:54 AM

Varika

Hey guys I couldn't be in class Wednesday due to an event in Dallas like I said so I see he mentioned a quiz which slide is it on? There's a few slides that look like they could be it but m not sure

OCT 6, 2:17 PM

Labeeba

2

This is the slide

Group Exercise: OneBusAway

Form 2-3 student groups, come up with potential classes for the App
and the class diagram

OneBusAway App Description

Find nearby stops on a map, choose from a list of favorite stops, add
shortcuts to your phone's home screen, and set reminders for
frequently used trips.

Problems with arrival times? Real-time arrival information comes from
your local transit agency. Please tap on the arrival time and select
"Report problem with trip" to tell them what went wrong. Or, reach
them via email by tapping "Menu->Help->Contact Us".

<http://onebusaway.org>

<https://github.com/paulcwatts/onebusaway-android>

32

OCT 6, 2:18 PM

Labeeba

3

Also we should all meet up before or after class sometime this week to get the requirements/project figured out

OCT 6, 2:58 PM

Gentry

1

I'm available, I hate this waiting, I want to get started.

OCT 6, 5:41 PM

Varika

1

@Labeeba Ahhh thank u so much for the slide!

Christopher Guerra

I have exams Tuesday through Thursday so I don't think I'll be very available

Varika

And yes I'm good to meet Monday after class! can't on wed

@Christopher Guerra Can u meet right after class or right before?

Sindhura Boppudi

I can only meet before class!

Christopher Guerra

I could do right before tomorrow

Varika

Alright lmk what time and where! I say 4:30?

Junior

I can meet before or after class tomorrow.

OCT 6, 6:17 PM

Labeeba

I can meet before!

OCT 6, 6:51 PM

Christopher Guerra

1

430 sounds good to me

OCT 6, 7:05 PM

Gentry

I'll be there as soon as possible I got another class that ends at 4:00 across town.

OCT 7, 12:23 PM

Gentry

Where we meeting up at tonight? The class room?

OCT 7, 12:30 PM

Labeeba

1

Y'all wanna meet like at those tables outside of the classroom?

OCT 7, 12:38 PM

Gentry

Works for me

OCT 7, 12:56 PM

Labeeba

1

Everyone please try to make it!! He mentioned last class that we have to take meeting minutes and account for the people present as a part of the project

OCT 7, 3:52 PM

Gentry

Omw. Phone will be dead by the time I get there. Going to the tables outside the room. Be there in 30

OCT 7, 4:19 PM

Varika

Alright I'm here there's no space for us so we can all meet and shift locations

Sindhura Boppudi

Is the classroom not free?

OCT 7, 4:21 PM

Varika

Nope students inside but maybe they'll empty out later

OCT 7, 4:27 PM

Christopher Guerra

I'll be a lil late, the classroom should empty out soon I think

OCT 7, 4:33 PM

Sindhura Boppudi

I'll be there in 5-10

Labeeba

Hey I'm outside like right outside founders

1

There are two tables we can use for now

Gentry

Upstairs?

Labeeba

No the same level as our classroom!

Sindhura Boppudi

Where exactly? In between FO and FN?

OCT 7, 4:54 PM

Varika

Hey what? I'm by classroom where is everyone

Classroom is empty rn

I'm inside been in this area for over half an hour come thruuu

Sindhura Boppudi

Come outside @Varika

in between FO and FN

Can everyone send their GitHub usernames so I can add you as a collaborator for the repository

Christopher Guerra

OCT 7, 5:08 PM

Amiel Vincent
avincent428

OCT 7, 6:37 PM

Amiel Vincent
Can we add another group member?

OCT 7, 6:44 PM

Gentry
I think so

Give me the info I'll send it to the TA and update him

Ok team, not sure how we got to waiting for project approval that is never going to come but moving on.

In the meeting today we came to terms with doing the anti theft project due to it being an easier project. If nobody has a problem with that we will move forward.

Top priority is getting a framework that has a user inter face.

Next is finding a library that can perform database operations.

Both should be fairly common.

Amiel Vincent added Zareef K to the group.

OCT 9, 9:28 AM

Varika

ECSN 2.902

OCT 9, 4:57 PM

Zareef K

2

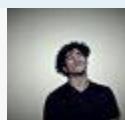

Hey y'all, so I'm the group member Amiel was talking about. Based off of what I've read of y'all's project proposal, it seems pretty interesting and very feasible. As for informing the TA, I've actually already sent him an e-mail about it. Oh and my github is Zarooooof

I don't think I'll be in class today though. I have two midterms tomorrow. but if y'all need anything or need to meet. I'll be free most of the weekend

Gentry

Cool I'll re-send him that conformation. Good to meet you. At the moment we are looking through github and other open source sites for a user interface and a data base or we will have to program it all from scratch.

Zareef K

Gotcha

OCT 9, 5:36 PM

Sindhura Boppudi

@Christopher Guerra Did you get an email from the TA? He's asking for a reply

Christopher Guerra

I did not

OCT 9, 5:42 PM

Christopher Guerra

Did it get sent to ya'll?

OCT 9, 6:44 PM

Gentry

I got nothing, I tried to send him a message but I couldnt find zaeef's info.

OCT 9, 6:59 PM

Varika

Hey guys couldn't be in class today but when are we meeting again so we are on track for these TA 1st iteration meetings?

Gentry

1

We could have a standing meeting after class if yall want

OCT 9, 10:29 PM

Zareef K

@Gentry What info do you need again?

OCT 10, 6:07 AM

Gentry

First last and I'd #

OCT 10, 10:46 AM

Zareef K

Zareef Kabir and Zxk160330. He should have it, as I mentioned it was for team 8 as well

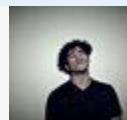

OCT 10, 12:13 PM

Gentry

1

Ok as long as he knows your on the team.

Zareef K

Cool

OCT 10, 12:36 PM

Labeeba

Hey guys which slide is the quiz over?

Noman Syed

When is it due

Labeeba

1

This Sunday

OCT 10, 1:31 PM

Sindhura Boppudi

1

It's the slide with the onebussaway app again, different question this time

Labeeba

What's the question?

OCT 10, 1:47 PM

Junior

1

Instead of a class diagram, you have to draw a sequence diagram.

OCT 13, 3:16 PM

Varika

Thank u fam legit frgt about this “quiz”

OCT 14, 11:59 AM

Gentry

Guys do we want to do a team meeting tonight or postpone until after the midterm? I personally have test all week.

Sindhura Boppudi

After the midterm might be better I have tests all this week too

OCT 14, 12:18 PM

Labeeba

Yes after midterms please

OCT 14, 12:28 PM

Gentry

Done and done

OCT 14, 4:16 PM

Noman Syed

1

Are y'all going to class today

Didn't he say that we'll be learning new stuff that isn't gonna be on the exam

Gentry

1

Skipping. I hate when teacher put shit in my head that's not on the test in 2 days.

Labeeba

Did he say how to study for this test lol besides the test sample

Gentry

1

No, just know the slides

Noman Syed

1

It's a shit ton of info

I'm not gonna go to class either gonna study for this exam can someone who's going let us know if he talks about the test ?

OCT 14, 4:41 PM

Varika

Did he upload the test sample already?

OCT 14, 4:52 PM

Gentry

Yea

OCT 14, 5:18 PM

Varika

Thank u! Found it! Doing it right now but Is he gonna give us the right answers for this test sample or no?

OCT 14, 5:31 PM

Gentry

1

Doubted it

OCT 14, 5:39 PM

Christopher Guerra

1

He said the sample test part 1 and 2 will have similar format but most likely not cover similar content

2

Part 3 will most likely have similar content coverage on the exam

That's all that he mentioned on the exam

Varika

Thank u!

Christopher Guerra

No prob

OCT 14, 6:18 PM

Zareef K

Yeah, today's class is all about a new topic

OCT 14, 6:31 PM

Zareef K

Hey, sorry to bother. But can y'all tell the TA I'm part of the group. He sent me an email about it

Re: Explanation for Project Proposal submission mistake(team 8)

HA Haque, Wasif Arman <wah180000@utdallas.edu>
10/11/2019 10:48 AM

To: Kabir, Zareef

Hi Zareef,

Can you please confirm if you are still part of this group? Some of your group members have said that they do not know about you being part of their group.

Best,
Wasif

On Sep 25, 2019, at 6:29 PM, Haque, Wasif Arman <wah180000@utdallas.edu> wrote:

Thanks Zareef, I haven't finished looking into all the project proposals yet. However, it should be done soon and I will make sure to include your name in Team 8.

Best,
Wasif

On Sep 25, 2019, at 3:52 PM, Kabir, Zareef <Zareef.Kabir@utdallas.edu> wrote:

OCT 14, 8:17 PM

Gentry

Sure will do first thing

Christopher Guerra

1

I guess we should all just send him an email

Gentry

By all means

OCT 14, 8:51 PM

Zareef K

2

Yeah, I thought I was good to go

appreciate it y'all

OCT 15, 10:47 PM

Varika

1

@Zareef K Emailed TA

OCT 16, 1:20 PM

Sindhura Boppudi

Have the answers to the sample paper been posted anywhere?

Christopher Guerra

Haven't seen anything on elearning

OCT 16, 2:55 PM

Gentry

No but they are all on chegg

OCT 16, 6:40 PM

Christopher Guerra

1

So much for part 3 being similar

Gentry

1

Lol I WAS not prepared to write test code THANK god they put the first conditions down because I could figure it out from there. That was a bit ruff at the end.

OCT 17, 5:48 PM

Gentry

Ok team on to the next. So we have a meeting with the TA coming up. Do we need to make an appointment or is he coming to class? Do we need a presentation? What all do we need to do before then?

OCT 17, 6:25 PM

Christopher Guerra

We have to make an appointment, first iteration details are in the slides

Gentry

Yeah I saw the tabs, is it personal or group meeting?

Christopher Guerra

Group I'm pretty sure

Gentry

Well then first thing first then. When do we want to make our meeting its soon.

Labeeba

2

Preferably the later time cause we need to get our wiki pages up still and plan the iteration

OCT 17, 6:56 PM

Zareef K

Thanks @Varika

And did y'all want to meet up anytime soon and discuss this again? I'm free pretty much the entire weekend

Gentry

1

I thin we should, we need to go over the plan for the next couple of week and pick some arbitrary titles, and make sure we get a good grade on that TA meeting.

OCT 17, 7:06 PM

Gentry

I'm free for the next 3 days

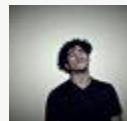

Labeeba

1

Can we meet Sunday at utd

I have an exam on Saturday

Zareef K

Works for me

Gentry

Works for me

Noman Syed

Sunday works

Labeeba

1

6 pm good w everyone?

Christopher Guerra

1

I won't be here this weekend so I can't make it, message me when ya'll meetup tho and I'll see what I can do to help

Gentry

6pm sunday. @Christopher if you can be on skype or something maybe ?

OCT 17, 7:14 PM

Varika

6 pm Sunday might or might not work for me if it does il Skype in

Gentry

Mater of fact if akype works for everyone we can just do that

Skype *

Christopher Guerra

Yeah, I can call in

OCT 17, 10:49 PM

Varika

Okay I am not available for Sunday at 6

Gentry

Bo skype either I assume? @Christopher Guerra @Varika when is good for you two?

No*

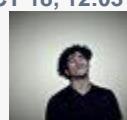

Varika

1

yea can't skype...earlier in the afternoon like 2 or 3?

OCT 18, 12:03 AM

Zareef K

3

Skype isn't an issue with me and any time on Sun is great

Noman Syed

1

Same ^

Gentry

I'm leaning toward a akype meeting for the future, just sounds like less driving and less squeduel conflicts

OCT 18, 8:46 AM

Sindhura Boppudi

Sunday afternoon is good with me too, sorry about the late reply! I can't do evening either

OCT 18, 4:48 PM

Labeeba

Wait so has someone scheduled w the TA yet

Gentry

Not I, was going to email him later today.

Labeeba

Okay let us know what he says please!

OCT 18, 10:33 PM

Varika

Okay what time are we doing for Sunday?

Labeeba

Can we do morning? I am pretty busy the rest of the day

Varika

That works too

Gentry

Any for me

We just going to do a skype meeting or try to meet up?

OCT 18, 10:36 PM

Labeeba

I guess just Skype

Varika

Skype I won't be on campus

Labeeba

Ok let's do 11 am?

Sindhura Boppudi

Could we do a little earlier than 11 or after 1? I have to meet a professor at 11:30/12 for another group project

Labeeba

What about 10?

Varika

10 works for me

OCT 18, 10:46 PM

Gentry

1

10 sunday

OCT 18, 11:01 PM

Christopher Guerra

That works

OCT 19, 1:37 AM

Sindhura Boppudi

Yup sounds good

OCT 20, 9:46 AM

Varika

Can we use google hangouts or if everyone has iPhone we can FT or r we sticking with Skype?

OCT 20, 9:56 AM

Gentry

What ever I'm getting on line now

1

I have no iPhone

Ok what info do we need to get everyone on the same skype

Varika

Skype IDs

Where is everyone

Gentry

Logging in now

Ok I'm @ live:thelocalgentry

Labeeba

Gentry do you have gmail

Gentry

Yea thelocalgentry2@gmail.com

Labeeba

Ok can we go google hangouts then? That way we can share docs and screens too

OCT 20, 10:02 AM

Gentry

Ok switching

Labeeba

Thanks!

My email is labeebafrana@gmail.com

Varika

okay I can switch too cN u guys give me 5 tho my email is vpinnam@gmail.com

What about the rest of the group...

Gentry

@Labeeba can you start the invites sence you know that software
We can only control who shows up, maybe we need personal numbers from now on for this problem

Labeeba

Yeah let's wait five mins to see if anyone else shows up

Noman Syed

I'm here

Noman.syed2021@gmail.com

For google hangouts

Junior

I am here. juniorikamba80@gmail.com

Christopher Guerra

I'm here, gimme a sec to get on my computer

chrisjamesguerra@gmail.com

Gentry

1

are we going to get an email invite?

Labeeba

Just sent them out

I can't hear anything one sec

Gentry

i got no invites

Labeeba

Gentry I sent you the link for it check your email

Gentry

got it that time

OCT 20, 10:19 AM

Labeeba

1

Would someone else mind starting the vid chat cause for some reason my sound isn't working

Christopher Guerra

1

I can do it

Junior

I haven't received an invite.

Varika

@Junior Sent u an invite hope on

Junior

Ok

Labeeba

Chris can you copy the link and email it to me please

Christopher Guerra

I haven't gotten an invite yet

Sindhura Boppudi

1

Hi sorry I thought we were meeting at 10:30 for some reason, I'm here! sindhurab1998@gmail.com

Varika

Alright sent u one

Labeeba

Varika can you copy the link to me and Chris

Varika

Which link?

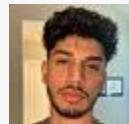

Noman Syed

I sent all the invite to all

Labeeba

Hm is it supposed to pop up in our email?

Noman Syed

You're invited to a video call on

Hangouts https://hangouts.google.com/hangouts/_/HJkgkASF4_uHrTCCEWd1AEEE

Labeeba

Did it work for y'all

Christopher Guerra

Did for me

Sindhura Boppudi

Yea, it says you're part of the call already @Labeeba

Labeeba

Huh it's just a black screen for me rn

Can y'all see me or no

Sindhura Boppudi

Nope, we can't maybe try exiting it completely and trying again

OCT 20, 10:35 AM

Gentry

cant see you cant hear you can you hewar us

Labeeba

Nope

Can somebody just ft me in if everyone's already there

Gentry

if you cant get it working would you like to try skype

Labeeba

Tbh that's just a hassle so I can just fit in if someone has an iPhone

Sindhura Boppudi

We can hear you now

Gentry

we hear you whispering

Varika

@Labeeba

Labeeba

OH LOL sorry that's my dad trying to help me

Can y'all see me

Gentry

no but we hear you fine

Labeeba

Ok just go ahead and start and I'll catch up

Gentry

@Labeeba did you ever get to work on the user stories

Labeeba

No I was just supposed to work on the wiki pages
Can someone resend me the invite on hangouts

Gentry

did you ever touch that? chriss is working on it
its up
scroll up

OCT 20, 11:42 AM

Sindhura Boppudi

Gentry send me whatever you wrote for today and I'll add it to my stuff for the meeting minutes. I'll begin scribing from the next meeting onwards and update the repo by this afternoon with everything

Gentry

i wrote nothing

i dont write in real time

OCT 20, 11:53 AM

Christopher Guerra

[guide and tasks.pdf \(0.1MB\)](#)

[User Story.pptx \(0.6MB\)](#)

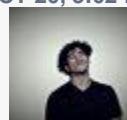

Gentry

2

team meeting tomorrow 4:30 outside of class, bring laptop to make sure you can GitHub

OCT 20, 3:02 PM

Zareef K

Hey, sorry I didn't show up today y'all. Honestly just forgot. That's on me. But I'll be there tomorrow for sure

OCT 20, 3:19 PM

Gentry

1

It happens, I forgot too until I saw the group me at 950 lol

OCT 20, 5:08 PM

Zareef K

Lol, what were y'all able to discuss?

OCT 20, 5:13 PM

Gentry

2

we made a plan to get all that we need to be done for the turn in. Ta meeting. we emailed him to ask for wed at 230. we need code, test code, wiki8, user stories, meeting notes, quite a lot before then. we will be meeting before class tomorrow at 430 bring a lab top so we can make sure everyone can get on git hub and drop lines of code and get ready for the meat and potatoes of this project.

I think Wasif is holding a slot on 2:30pm.

If he has been booked, I still have Monday and Tuesday 1:30pm open

Hongyao

Get Outlook for iOS

OCT 20, 6:15 PM

Gentry

thats the email i got from him

OCT 20, 6:28 PM

Sindhura Boppudi

I have class Tuesday 2:30 so if we're not delayed then I can do either, but Monday would be better for me

OCT 20, 8:31 PM

Gentry

we cant do monday we dont have what we need to turn in

OCT 20, 8:45 PM

Noman Syed

I have a class during that time

Labeeba

1

Is wasif booked?

Can you email him to make sure

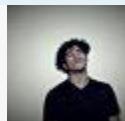

Gentry

1

ok, team, I have CCed an email to you all, in it, you will notice there is a time and date of Tuesday the 22nd at 1:30 pm. I have confirmed this date without talking to the team because there were no times available on Wednesday and we need the Monday to finish our task. If you can be there please do.

i have emailed him, it was part of my first email. i cc'd the other TA and he is the only one responding. If we wait much longer we may not get Tuesday at all. If wasif responds and says wed is good I will cancel the Tuesday, but I felt it a must to get a time in that wasn't Monday.

Zareef K

1

Ok, so I can make it to the TA meeting.

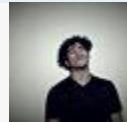

1

And I don't think everyone has to be there for that at least. So it should be fine if just some of us can make it

Gentry

great, i will skip my other class and I will be there. agreed zareef

Zareef K

Lit

Labeeba

1

I'll be there for the TA meeting

Gentry

Yes, time is correct. I'll be at ECSN 2.114 then.

Hongyao

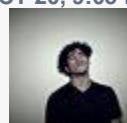

1

@labeeba you got voted secretary while your headset didn't work this morning. you take the best notes. don't worry though titles mean nothing lol

do you guys have any grades for this class posted?

like as in ANY? quiz, test, hm, ANY?

OCT 20, 9:05 PM

Zareef K

1

Nope lmao

Gentry

ok well, that makes me feel shit tons better. thanks.

OCT 20, 9:21 PM

Gentry

tornado in dallas just landed be carefull all its right by me
tearing shit up

OCT 21, 2:31 AM

Gentry

1

@Labeeba Yes, I already have an appointment scheduled on Wednesday 10/23 with a team. Gentry, please schedule a meeting with Hongyao on Mon / Tue. Thanks.

Best,

Wasif

OCT 21, 3:38 PM

Gentry

just read this..

OCT 21, 3:38 PM

Gentry

Please note that you DO NOT need to
write the test cases as mentioned in the webpage.

Christopher Guerra

OH

Varika

So to clarify, we are all meeting today before class. And then Tuesday at 1:30 with TA?

Gentry

correct i am already here

Varika

But it's 4:30 right for the rest of us?

Gentry

correct

OCT 21, 4:28 PM

Gentry

anyone here yet? im in the front of the FO 2nd floor typing let me know where yall end up

Amiel Vincent

Me and Varika are in a meeting for another project will be there soon

It's running a bit late

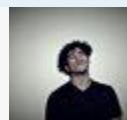

Zareef K

Yeah think I saw u

Gentry

Zareef K

Were u on the floor?

Noman Syed

1

Hey guys sorry I might not be able to make it at for the meeting something came up but I'll be at class we can talk after class

Gentry

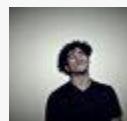

no im sitting in a chair on the 2nd floor front of the building

Labeeba

We're in the front

Don't see u

Zareef K

Can you come to the side with the vending machines

Labeeba

Actually can you just come meet us in front of the classroom

Gentry

omw

OCT 21, 5:02 PM

Varika

ECSN 2.114

OCT 21, 5:02 PM

Sindhura Boppudi

ECSN 2.114

OCT 22, 12:09 AM

Christopher Guerra

1

Finished the progress report, seems the estimated and actual columns are the amount of effort a user story takes to be completed

OCT 22, 8:12 AM

Gentry

3

Morning folks. If you have not put in your experience or signed the team contract please do that asap. Meeting today at 1:30 pm at ECSN 2.114.

OCT 22, 1:02 PM

Gentry

Have we put in all the team meetings? Not at a comp right now

OCT 22, 1:39 PM

Gentry

4

Meeting over we did great

OCT 22, 1:55 PM

Christopher Guerra

Awesome! Nice work ya'll

OCT 22, 2:59 PM

Christopher Guerra

Did they mention what we should have for the next iteration meeting?

Noman Syed

Did you guys understand more about what's expected

Gentry

No and no. HE didnt know...

Noman Syed

He didn't know what ?

Christopher Guerra

Anything about what's expects

Noman Syed

Lmao

Christopher Guerra

Expected*

2

I guess we just do our best to get something working by next iteration along with test code

OCT 23, 8:57 AM

Gentry

Yeah he literally said. "I'm not sure what you should have done by now." Said the teacher will let us know when the next iteration is.

OCT 23, 6:44 PM

Christopher Guerra

He's droppin "quizzes" in the slides now apparently

Noman Syed

Are they due though?

Christopher Guerra

Nah, I think he's just trying to make us freak out about them so we pay attention
Definitely not actual quizzes

OCT 23, 6:58 PM

Varika

I had a meeting couldn't come is he gonna email us these

OCT 23, 7:05 PM

Christopher Guerra

No they're in the slides, but don't worry about them they aren't graded

They were more like examples for the material

OCT 28, 1:50 PM

Junior

Hey guys, are we meeting today at 4:30 PM or Wednesday?

OCT 28, 2:03 PM

Christopher Guerra

3

We could meet wednesday, still trying to figure out how we should go about setting up an eclipse workspace with github

OCT 28, 2:10 PM

Junior

Okay

OCT 28, 2:44 PM

Gentry

4

Sounds good I wont be there today. I will be there on wed. We need to assign programming partners and parts of the project.

OCT 28, 5:37 PM

Noman Syed

He's taking attendance today

Christopher Guerra

Ah dammit

Right now?

Noman Syed

Yes

The image shows a classroom environment. In the foreground, the back of a student's head and shoulders are visible, wearing a dark jacket. Behind them is a large projection screen mounted on a wooden-paneled wall. The screen displays a Microsoft Excel spreadsheet titled "roster-se1334502.19f-2019-10-26-173630 - Excel". The spreadsheet contains two sheets: "report" (active) and "Data". The "report" sheet lists student names, IDs, and contact information, along with their grades (ugrd or ugr) and credit hours (3 or X). The "Data" sheet shows the same information in a larger, less visible grid. The room has recessed lighting in the ceiling.

Christopher Guerra

Welp

1

He got me

Noman Syed

He's calling names or else I'd had y'all

Christopher Guerra

1

All good, thanks dude

Varika

1

Ahh I'm not in town I'll email him

OCT 28, 6:53 PM

Gentry

Haha

OCT 30, 8:39 AM

Varika

1

R we meeting today?

OCT 30, 9:44 AM

Christopher Guerra

3

Yeah, 430 good for ya'll?

OCT 30, 3:30 PM

Gentry

Yes. 430. Shouldn't be much to go over.

OCT 30, 3:31 PM

Christopher Guerra

Yeah the repository situation shouldn't be too hard to settle
Is the next iteration meeting supposed to be soon?

OCT 30, 3:42 PM

Varika

Were u able to get the eclipse thing figured?

OCT 30, 3:48 PM

Christopher Guerra

Yeah, I think we all need to make sure we're using the same version tho

OCT 30, 4:11 PM

Zareef K

Hey I might not make it today, something came up

OCT 30, 4:21 PM

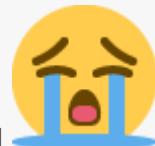

Gentry

Iteration not too soon but no date. Regardless we got a month to make this. Btw om walking to the location

Varika

So do we have to meet today? It's gross and cold

Labeeba

Whoever can let's meet I'm already driving to campus

Junior

Running a bit late but I will be there.

OCT 30, 4:30 PM

Gentry

We are downstairs underneath the classroom

Sindhura Boppudi

Underneath the classroom?

Gentry

Yes. Go to classroom. Look for stairs. Go down.

OCT 30, 4:40 PM

Varika

Huh

Noman Syed

Where

OCT 30, 8:34 PM

Varika

1

Hey guys so from today a lot of changes were sitting unstaged in atom; pulling, merging, and repushing worked comment by @Sindhura Boppudi showed up... try entering ur coded by: name thing now?

NOV 1, 7:04 PM

Gentry

I will be in my workstation for the next 3 days strait. I'll try to put in some work towards that.

NOV 2, 9:00 PM

Gentry

Whoever is doing meeting notes, did we get them for last meeting?

NOV 3, 1:00 AM

Sindhura Boppudi

1

Yup! I'll upload them to our wikipage soon

NOV 3, 3:18 AM

Gentry

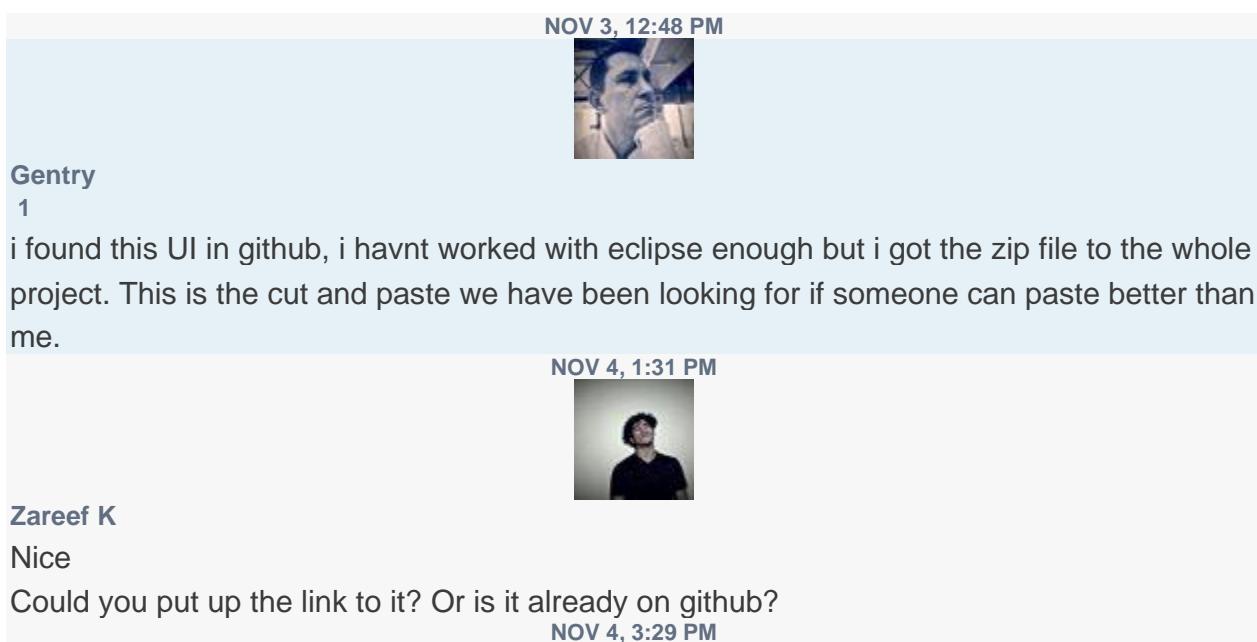

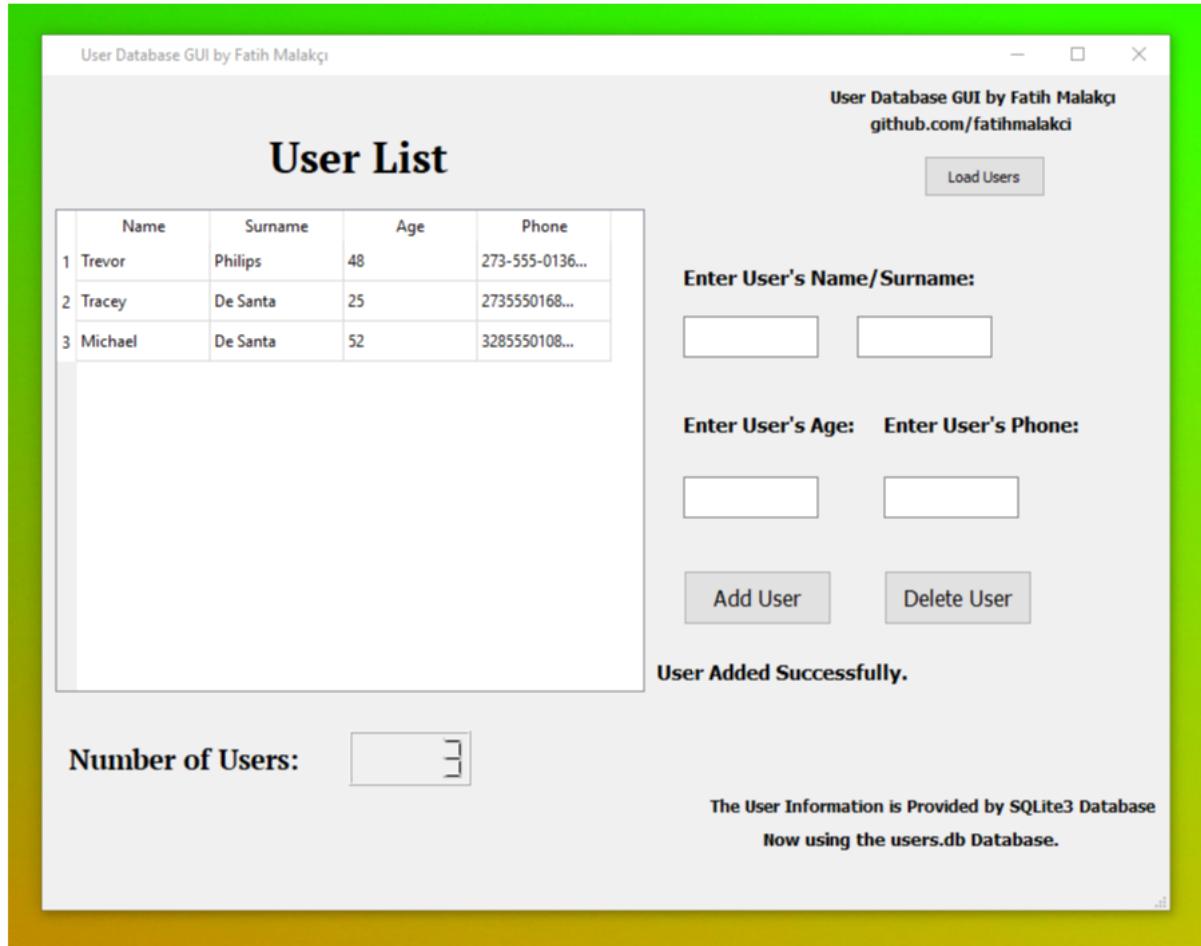

1

You rock!

NOV 3, 12:46 PM

Gentry

Labeeba

1

I think he emailed it to us

Sindhura Boppudi

Hi everyone are we meeting today? I unfortunately can't make it so someone else would need to take meeting minutes

Varika

Hello guys I'm out of town until Thursday won't make it if we r having meetings but lmk wat

needs to be done?

Christopher Guerra

I was gonna look at trying to implement the gui's Gentry found if anyone wants to help with that sometime

1

Let's meet up on Wednesday tho

Gentry

Let's meet up wed! I got a big test tomorrow then I'm free for a good min to do what ever when ever. @Christopher Guerra we can skype or whatever I'll catch up with yall after 3pm tomorrow.

Skipping class to study hope he doesn't take role lol

Christopher Guerra

2

I'll be at class for the first half so I'll let ya know if he does

NOV 4, 4:48 PM

Zareef K

Do y'all remember if he took attendance last class?

@Labeeba gotcha

Gentry

1

He did not last class, because I was there pissed

NOV 4, 4:55 PM

Zareef K

This teacher, I swear

1

Most self taught class I've had thus far

NOV 6, 8:46 AM

Gentry

My registration for spring starts at 9am today. Reminder for who needs it.

Christopher Guerra

1

Same here

NOV 6, 2:53 PM

Christopher Guerra

2

I can't make it to the meeting today cuz I need to go see my professor, but I did start on some of the gui for the java application so I'll push that to github in a bit

NOV 6, 3:11 PM

Zareef K

Are we meeting in the same spot?

Gentry

I didnt like that last spot. First one to get there try to find somewhere. We just need to upload what Chris did and see where to go

Amiel Vincent

I can't make it today

Gentry

Ok

Sindhura Boppudi

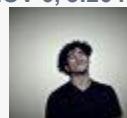

I'm in California for a conference so could someone else take meeting minutes

Gentry

Yall just want to scrap the meeting? We can just do a skype this weekend

NOV 6, 3:26 PM

Zareef K

1

Think that might be better if we're already 3 ppl short

Gentry

Agreed

NOV 6, 3:32 PM

Labeeba

1

Yeah let's meet next Monday?

Wednesday is our next meeting

Gentry

We can talk over the weekend let's skip today

NOV 6, 8:33 PM

Gentry

7

PLEASE READ

PLEASE READ.docx (0.1MB)

NOV 6, 10:05 PM

Labeeba

3

Thanks gentry!

NOV 7, 11:08 AM

Gentry

1

Good morning team. I am working on a flowchart and a few other things i will share later today, but i need some information from the team so please respond.

1

First if you read my word doc i would appreciate it if you would give it a heart so we as a team can know you are here to help push through this home stretch with the team.

Varika

1

Helloooo I am back in town! Will read the doc and yes meeting Wednesday and down for a

Skype call for the weekend

Gentry

Next, we need partners, I don't even care how the Partners work together that will be up to you guys, but we have two choices. One, we pick partners and go. Two, we put out schedules and see who matches. Three we assign based on knowledge. It won't matter too much because partners will have to be switched each week from here on out, or at least the appearance of it in the documentation.

three* (came up with one while typing)

3

Thanks as always for putting up with my block of text, I know I am nobody's boss, it is just in my nature to run teams because I am passing this class no matter what and thank you to everyone who helps me do that! LETS GO TEAM!

NOV 7, 7:36 PM

Gentry

ok team, Thanks to our program manager Chris, Here are the things that need to be worked on. Feel free to pick what you want to work on. I only ask that you team up with a partner if at all possible to make the teacher happy and post what section you are working on in this chat so we don't double up on the task.

NOV 7, 7:36 PM

Gentry

Christopher Guerra

So we need a ui which allows to user to sign in or create a user

Then we need to take the input from that gui, check validity and then use it/store the info

Then we need to setup a database that can store that info

Then we need to setup connection between the application and the database

Then we need a script that can lookup stuff in that database using probably either username or the number for the id tag thing

Oh and we also need to setup the test code stuff (reachability or whatever) for the application

Some of this stuff will take longer than others

I say we do an application with temporary storage so that we can mock-up some test code for the iteration meeting

NOV 7, 7:46 PM

Sindhura Boppudi

1

I can work on the ui with someone

Noman Syed

2

Let's work on ui together

2

@Sindhura Boppudi

NOV 7, 7:55 PM

Christopher Guerra

2

Labeeba and I are gonna work on the db

2

I suggest making different windows for each part of the gui by the way. Like one for choosing sign in and create user, if create user then take them through a series of things to set personal and login info.

NOV 7, 8:06 PM

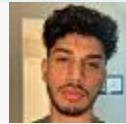

Noman Syed

Sounds good

Gentry

@Noman Syed @Sindhura Boppudi which ui are you guys working on. The "enter password" or "enter name and muber" ? I'll work on the other Number*

Noman Syed

Both ?

Let's talk on skype soon I have some ideas

Busy right now

Gentry

I suggest picking one for now. We need test code on each part as well. Talk when ever.

Noman Syed

1

Yeah we can do login but that would take like 2 mins lmao

But sounds good

NOV 7, 8:21 PM

Varika

1

@Gentry We r partners then? what do u wanna work on for next iteration also when should we do our call guys Saturday afternoon/evening work?

NOV 7, 8:31 PM

Gentry

Well that's what I was just thinking. I cant find what to work on. I need something for my grade lol. If team one does database, team two does user input, that's the whole program lol

As for the skype I'll let yall work that out I am literally sitting in front of this computer until Monday at 6am.

Varika

1

We can do the test code stuff? Idk @Christopher Guerra which part do u think we should take cuz dividing it by user input/GUI and database among two groups is too big

Gentry

I believe each team needs it's own test code, so not sure that will work.

NOV 7, 8:35 PM

Christopher Guerra

1

We could have 2 people make the gui and then 2 setup the actionlisteners

Gentry

Well looks like we got action listeners.

Varika

Okay sure we can do that what are action listeners?

Gentry

No clue but I will get it done. Lol

That's why chris is the program manager lol

Christopher Guerra

It's basically the input side of the gui, without actionlisteners the gui does nothing

Gentry

So we build a normal java program for password, and one for input to the data base then later we will link the gui to it?

That's doable

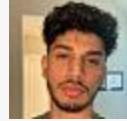

Noman Syed

It's gonna be like "create an account" type right

Gentry

Sighn in or create, for one

Noman Syed

Cause you have to create to log in

Can't log in if they haven't been registered

Gentry

Yes but dont want to have to create everytime

So registered users should have a log in

Christopher Guerra

1

Yeah, so one window with create and sign in options

1

Plus if the user tries to sign in and there isn't a user we just need to add a check to see if that user actually exists

Gentry

Second half should be a log new number, or look up number. And maybe a slot for item description by user. So like 1234 bat

NOV 7, 8:53 PM

Christopher Guerra

1

Yeah if they sign in let them do that stuff

NOV 8, 1:57 PM

Labeeba

1

@gentry could you make sure you have the tasks within the user stories labeled out because he wants to see that for our next iteration

@Noman Syed @Sindhura Boppudi Chris and I just worked on the database but we wanna check out how y'all are doing in the GUI to make sure it has everything we need

NOV 8, 2:04 PM

Gentry

@Labeeba I'll check that out, also do we need linking terms for your database. So we call functions with the correct name.

NOV 8, 2:42 PM

Gentry

whoever is doing the meeting notes have they been added to the wiki in real-time? it is supposed to be within 24 hours

NOV 8, 2:53 PM

Christopher Guerra

Labeeba and I met from 1245 to 2 today

Worked on database creation

1

Using SQL Developer and Oracle DB

NOV 9, 6:59 AM

Gentry

Anyone want to meet up tomorrow and bust out some code for the back end of user input?

NOV 9, 9:21 AM

Gentry

1

As for the iteration and YOUR personal score. I believe if you put in code, and test code. On YOUR part. YOU should be good.

1

Linking them up can wait.

NOV 9, 10:26 AM

Junior

I am planning to be on campus this afternoon if you want to get some work done.

@Gentry

Gentry

What time, I'm super busy tonight got a wedding to do to.

Go*

Junior

4pm. We can do tomorrow if you want.

Gentry

Yeah got to pass tonight but I'm DOWN for tomorrow. Anyone else that wants to join can can as well so we all get some credit and know what's going on with the project.

Varika

2

Yes I'm down for tomorrow!

Junior

1

Ok

Gentry

Great lets get an early start if at all possible. We can switch partners ever so often.

NOV 9, 12:22 PM

Christopher Guerra

1

I'll come join ya'll around 530

NOV 10, 7:17 AM

Gentry

Morning folks, let me know when yall want to meet up

NOV 10, 9:29 AM

Sindhura Boppudi

How about 5:30pm?

NOV 10, 9:29 AM

Gentry

Ok

NOV 10, 9:48 AM

Junior

I'm down for 5:30pm.

Do we still have the video call this morning? Or just the afternoon meeting?

Gentry

No need for call imo just need to get this shit done

Junior

Ok

NOV 10, 1:57 PM

Varika

5:30 is good location same space outside our classroom or somewhere else?

NOV 10, 2:20 PM

Gentry

first one there looks for a place with plugs.

NOV 10, 5:33 PM

Sindhura Boppudi

Where are y'all?

Varika

On my way!

Sindhura Boppudi

Some of the buildings are closed lol is founders open

Labeeba

In front of the classroom

1

At a table

Noman Syed

Running a little late

NOV 10, 11:47 PM

Gentry

2

Thank you to everyone that showed up tonight great to see you all, and thanks for your help. BIG thanks to @Christopher Guerra for helping us get through this BS. If you were not there tonight make sure you get what you need for your grade. talk to you all tomorrow

NOV 11, 3:07 PM

Zareef K

Meeting today?

Varika

1

No I don't think so since we don't even have class

We are ready for iteration 2 with TA

^^or so I believe

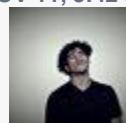

Christopher Guerra

@Junior Have you pushed what you have to your branch?

Also we probably need to clear up any unnecessary stuff in the repository

NOV 11, 3:42 PM

Zareef K

@Varika gotcha

NOV 11, 3:51 PM

Christopher Guerra

I'm pushing a few jar files to the master branch that should fix the main class problem from yesterday

Junior

Ok. I haven't pushed anything since yesterday.

NOV 11, 6:02 PM

Gentry

Had to share....

The used computer I bought.....

I'm signed into his google account

He prepares taxes

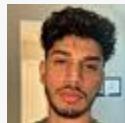

I now have 50 tax returns and 150 social security numbers....

I wonder if he wants this back?

Christopher Guerra

Should probably talk to whoever had that last lol

Noman Syed

.... lmao

Gentry

I think so.

NOV 11, 7:29 PM

Christopher Guerra

I pushed those necessary files to the master, figured out what needs to be done for commits in eclipse to work

When you make a commit in eclipse you have to then push it to the online repository by going to team->remote->push

Click next on the window that pops up, then on the next page under source ref change it to the branch you're pushing to which should be the one you were working on in eclipse, then click add spec and next, then click finish on the next page

Overly complex way of doing it but that's how it's gonna be I guess

Gentry

All that just to make // comments?

Christopher Guerra

Pretty much lol

NOV 11, 7:45 PM

Christopher Guerra

1

I'm going to record a video tonight to demonstrate how to setup git on eclipse too

Also we still need a database since writing userinput to a textfile would be pretty jank

1

And since when the app closes all that info will be gone

Sorry for the message explosion

Gentry

2

It's always ok by me

NOV 11, 10:50 PM

Christopher Guerra

4

Instructions for Github Setup.docx (0.1MB)

1

Video was too hard, sorry but you'll have to read

NOV 11, 10:54 PM

Christopher Guerra

@Labeeba @Junior @Gentry @Varika @Amiel Vincent @Zareef K

1

@Noman Syed @Sindhura Boppudi

Varika

1

@Christopher Guerra Thank u for doing all that srsly amazing

Christopher Guerra

No problemo, hopefully all is in order now lol

NOV 11, 11:19 PM

Christopher Guerra

Once you read it please like it so I know who's up to speed

NOV 12, 3:12 PM

Labeeba

@Gentry When you do the update stories, make sure they're on the separate wiki page.

Chris just created a user stories iteration 2 that you can update

Gentry

Ok I'll get on that in about an hour

Hour

Labeeba

1

sweet thank you

NOV 12, 3:42 PM

Labeeba

Also what time is our iteration meeting tmr lol

Gentry

Class

Labeeba

During class?

Gentry

Yup

Check the slide for confirmation

NOV 12, 4:22 PM

Christopher Guerra

If ya'll wanna meet to coordinate stuff tomorrow I'm free from 1115 till class starts

NOV 12, 4:37 PM

Gentry

We should at least have a demonstration plan. Be best to meet up. I'm busy until 4ish depending on how long my lab goes

Varika

Tomorrow doesn't work for me

NOV 12, 5:12 PM

Christopher Guerra

1

I will be on campus until then so if anyone is available at anytime before class I'll be at ECSW

NOV 12, 5:18 PM

Gentry

1

I'll be there as soon as I can

NOV 12, 7:49 PM

Gentry

1

Gentry's Progress report:

NOV 12, 7:49 PM

Gentry

Been sick all day so cut and pasted the user stories from one to two
put in my experience, wasnt there from 1st one
found out you can just fix code, and write notes by simply going into git hub and editing. No need to use anything else.

Put in agenda for iteration 2

now im going to go write notes for the code me and junior worked on

NOV 12, 8:12 PM

Christopher Guerra

Awesome thank you, make sure to get some rest dude

NOV 12, 8:21 PM

Gentry

ok did the Super notes for the password. Will do the same for the rest throughout the day
tomorrow im dead

they format CRAZY once you send...

NOV 12, 9:40 PM

Varika

Trying to work on product class right now but cannot run anything to test
Says main class can't be found or loaded

NOV 12, 9:45 PM

Christopher Guerra

You have to pull from the main branch because I added some necessary files

NOV 12, 9:58 PM

Varika

Hey I did that and master is running now but password branch isn't...I made a driver main class for password to test some stuff and it's not working can u help?

Or let me know what to do? I tried cleaning and rebuilding google suggests changing the build path but I don't wanna mess it up

@Christopher Guerra

NOV 13, 6:02 AM

Gentry

Did you download password? I made changes. //notes

NOV 13, 12:52 PM

Christopher Guerra

1

I'm updating password with the files from master now, ok one sec

Gentry

So to make changes on password on eclipse I have to clone each branch separate correct?
I cloned the project on my new lab top and only got main.

Christopher Guerra

1

When you first import the project from git there should be a window that allows you to select the branches you want

It's possible the branch you currently have selected is out of date compared to the current master branch

1

Committed those changes @Varika , try pulling to password now

NOV 13, 12:58 PM

Gentry

As soon as I'm done with this lab I'll head strait to utd

Christopher Guerra

1

To update a branch with changes made in another branch is something I will add to the word doc

NOV 13, 1:04 PM

Christopher Guerra

Updated the doc

NOV 13, 3:31 PM

Labeeba

Hey guys me and Chris are in ecsw, if y'all wanna come here and work out whatever we need to before the meeting

Noman Syed

Where in ecsw

Labeeba

1

The tables behind the stairs

NOV 13, 3:44 PM

Gentry

1

Onw 30 min

NOV 13, 3:57 PM

Zareef K

I'll be there in a bit too

It's about time I got something done

NOV 13, 4:09 PM

Sindhura Boppudi

1

I'll be there in 10

NOV 13, 4:15 PM

Junior

1

I will be there in 15-20 minutes.

NOV 13, 4:46 PM

Varika

Hey guys was meeting a prof like I said so I'm on my way now

NOV 13, 4:51 PM

Christopher Guerra

Ok all good

NOV 13, 5:01 PM

Varika

Oh ECSW!

NOV 13, 5:34 PM

Labeeba

Hey guys they're starting

Junior

1

Comment out the main method in user class

Labeeba

Who's moderator and author

I can be scribe

Gentry

Gentry introduces, Then gui, then junior and gentry for password, then other 2 for user create, then chriss and labeeb finish up

Christopher Guerra

@Junior on the password branch?

NOV 13, 5:43 PM

Sindhura Boppudi

I'm scribe right? Or am I author

Are we going after this group or

NOV 13, 5:52 PM

Labeeba

I think it's just describing the iteration meeting roles

Gentry

just trying to make sure me , junior, and the other 2 guys get something to talk about
junior can do either password, or new user or what ever

Labeeba

1

So I can say gentrys is moderator, Chris and varika are authors, me/sindhura can be the scribes

Gentry

1

i can come in after its all over and talk about iteration 3 if need be

NOV 13, 6:28 PM

Gentry

1

good job team. its over.

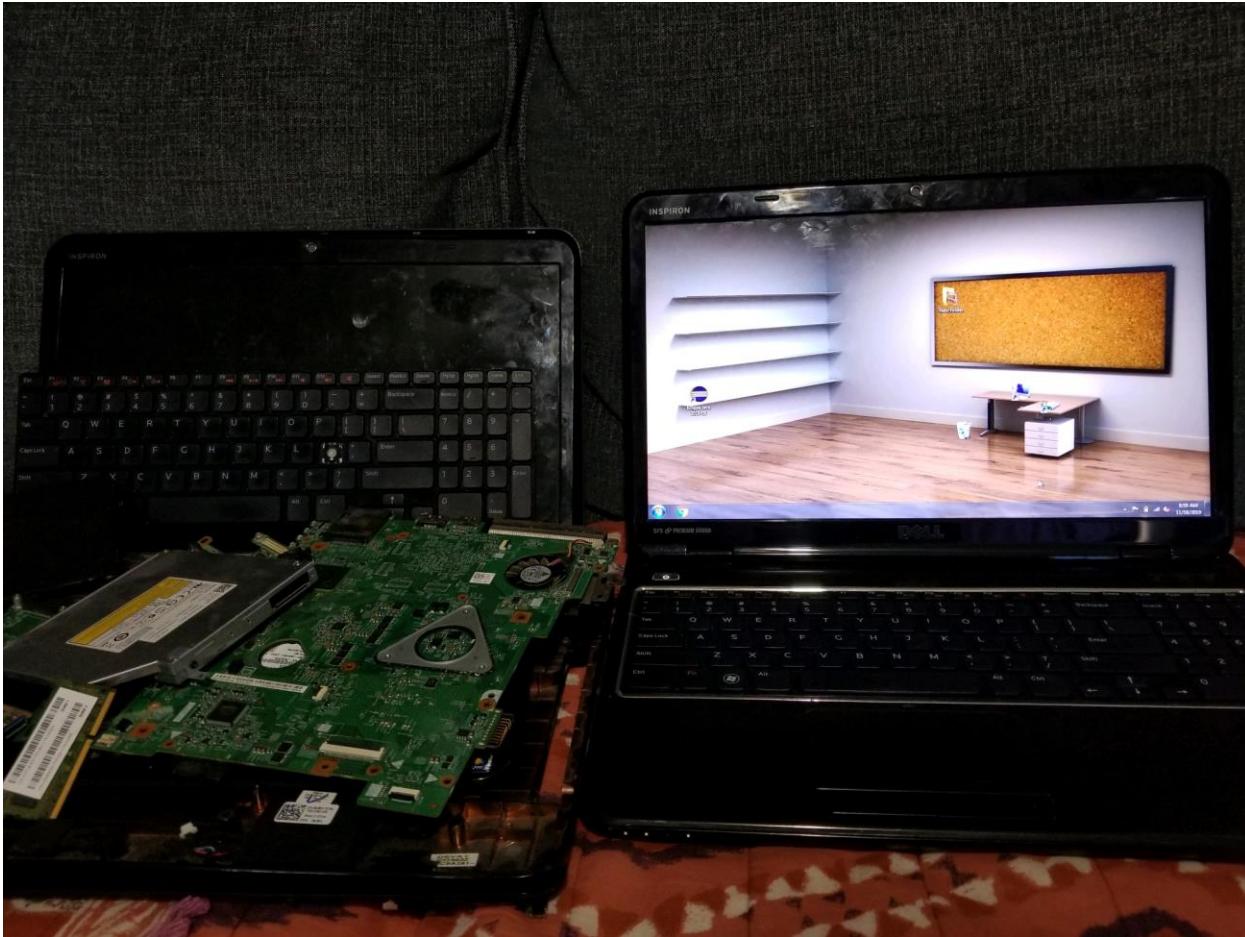

NOV 18, 10:59 AM

Gentry

1

You know your an engineer at heart when you take two broken laptops and make one good one.

NOV 18, 4:56 PM

Labeeba

1

Hi guys me and Chris are meeting rn same place before class to work on the project come thru if you can cause we are trying to edit GUI

NOV 20, 11:24 AM

Christopher Guerra

1

If anyone can let's meet today before class. I should be free around 1

Gentry

I cannot today or tomorrow but am free every minute after until this is done. GI

Sindhura Boppudi

2

I'm really sick So I won't be able to come today either :/ sorry guys I'll work more on the GUI over break

Gentry

1

Sorry to hear.

Varika

2

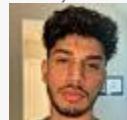

Hey @Sindhura Boppudi hope you feel better soon! You've done a lot so don't worry rest up! And @Christopher Guerra I'll be free around 4 ish if you want to meet

Christopher Guerra

Sure thing, I'll meet you in ECSW

NOV 20, 3:46 PM

Noman Syed

Where are y'all

Varika

Omw

Christopher Guerra

I'm omw too

Noman Syed

Ecsw

NOV 20, 3:49 PM

Christopher Guerra

You there right now?

Noman Syed

Not yet

Christopher Guerra

1

Aight, meet in the usual spot

Junior

Sorry guys I can't attend the meeting today. I will work on the project when I can.

NOV 20, 3:57 PM

Gentry

I will not be there

Christopher Guerra

1

All good ya'll, we need to coordinate our efforts before the break

1

So whether it be meeting or a call, we all need to meet up and talk to-do list

Varika

Hey I'm in Ecsw near the tables

Noman Syed
Grabbing food now
Coming

NOV 20, 4:14 PM

Gentry
I will be doing nothing but this project over break.

NOV 20, 5:50 PM

Labeeba
2
Just so y'all know, he just told us the project demo is due most likely the Monday after break
2
And then exam that Wednesday

NOV 20, 7:57 PM

Varika
1

And we have a quiz 4 which probably won't be graded like the first 3

Christopher Guerra
Yo is there a SE class Groupme?

NOV 20, 9:57 PM

Gentry
Not that I know of

NOV 22, 2:00 PM

Sindhura Boppudi
SO what is Quiz 4? He posted an announcement but are the instructions in the slides again?

NOV 22, 4:09 PM

Labeeba

1

No it's just creating a program that DSE can't run analysis on
DSE is explained in the slides I think

Okay guys this project is due week after next and we need to meet up cause we need to
figure out action listeners and test code for every part

NOV 22, 4:18 PM

Labeeba

3

We for sure need to meet up probably Sunday night

NOV 22, 4:23 PM

Labeeba

3

the Sunday before break ends i mean

NOV 23, 12:21 PM

Gentry

is the final over everything?

NOV 25, 10:56 AM

Gentry

1

Good morning team. I have got other classes on m,t,w at another school, but every other
min from now until monday is devoted to finishing this project. If anyone wants to meet up in
person or digitally let me know I will announce what I'm working on in chat.

NOV 25, 11:32 AM

Sindhura Boppudi

For the database, what all information are we storing from the user? What should I ask
users to input when initially making their accounts?

NOV 25, 11:39 AM

Gentry

1

The "system" should store the (item description) with the associated tag number (which could be unputed or moved over from its creation) and personal information. Personal information could include the following: name, address, phone number, and email. Or any combination there of.

*could be input

The big picture is, pawn show scans. Beep. Number pops up. They check. Number belongs to "bla bla at bla bla and I can contact this person at bla bla"

Shop*

NOV 25, 3:04 PM

Christopher Guerra

2

Right now it's storing user info including: first name, middle initial, last name, street address, city, state, zipcode, phone number, extension, and account id

2

Account info includes: email, password and account id

2

Tag info includes: Item Brand, Item Description, and account id

2

Decided to just associate tags with account numbers

NOV 25, 3:15 PM

Gentry

So where are we at. What needs to be done. And how to we make all the separate branches work together

NOV 25, 3:21 PM

Christopher Guerra

So the GUI needs a few more things I believe, and then we need to make it functional with action listeners

A few more Database Queries need to be added, I've been struggling with setting up remote connection a bit but that's the main issue there

Varika can tell you how this user class is goin, but we also need JUnit test code for everything

Once the GUI frontend is done we can merge the branches and start adding database connection to the user class which will then check input info validity as well as output requested info

To the GUI

NOV 25, 3:34 PM

Christopher Guerra

2

JUnit test code is a must and there's plenty to be done so read up on it in the slides asap

NOV 25, 3:39 PM

Gentry

1

I got you!

NOV 26, 11:45 AM

Labeeba

1

1

Helpful video on setting up junit tests in eclipse

2

Please get familiar with it and please start writing test code for anything and everything, we've got 6 days to complete this project! :)

NOV 26, 12:19 PM

Varika

1

@Christopher Guerra Okay I'll write junit tests for user/product as far as the back-end I think it's almost done but I'll have to test it more

Christopher Guerra

1

Cool, I'll finish up the query methods and then we can merge branches. After that you should be able to implement my methods for setting and retrieving variable values

NOV 26, 1:04 PM

Gentry

I'll be on in about an hour, and for the rest of the night

NOV 26, 2:08 PM

Noman Syed

I can't get the JList to work

X

Meme

Register new products

Manufacturer/Brand Name: I

Item Description:

1

0 0 0

To make this page I was going to use jlist but it won't go on the form for me
1

@Sindhura Boppudi Can you make this page see if it works for you?
I'm gonna start working on the input validation

Christopher Guerra

You could try JTextArea instead and we could just insert newlines after each entry

Sindhura Boppudi

Yea I'll make it tonight

Christopher Guerra

[stack overflow](http://stackoverflow.com/questions/27698592/how-can-i-create-a-new-line-in-jtextfield-to-type-in)
NOV 26, 2:24 PM

Varika

When u guys link GUI with backend make sure getname, getAddress are called so account info is visible and there's buttons for displayItems and createProduct

NOV 26, 3:22 PM

Gentry

I'm home, I'm done with my other classes. I'll be online asap

NOV 26, 10:37 PM

Gentry

anyone on?

NOV 26, 10:46 PM

Christopher Guerra

Yeah, I've been workin on the Database querying branch. Takin a lil break for a sec cuz I've been doin stuff for a while

Gentry

im on the project i want to get the GUI hooked up with the back end has that been done yet

NOV 26, 11:02 PM

Christopher Guerra

No, I'm writing up server code so right now for remote db connection so gimme some time

Gentry

all the time you want just looking for shit to do

Christopher Guerra

What about user class and GUI branches?

Sindhura Boppudi

I'll be working on GUI tonight Im just finishing another assignment that's due at midnight right now lol

Christopher Guerra

All good, we got time

Sindhura Boppudi

I'll get the basics at least set up by tonight and make it look pretty later so we can link it up to the database

Gentry

the user class confuses me, is it old or linked up with another class?

cause the gui class seems to have all we need

Christopher Guerra

User class will link with mine and GUI will then link with User class

Gentry

ahh got ya

@Sindhura Boppudi do you want me to leave the gui alone then ?

Christopher Guerra

I thought user class might be better for checking if requested and input data were valid so our actionlisteners don't look like a mess

Gentry

ok might be able to work on that, or at least i have a goal now

Christopher Guerra

1

I'll keep pushing my stuff regularly so you can stay up to date on my variable names and method calls. I give examples of how to use the query methods in my QueryTesting file

1

Just don't use any create methods yet so the database isn't filled with a buncha test data just yet. Focus on checking input values from the user

Gentry

sounds good

NOV 27, 12:10 AM

Gentry

when i push i just push to branch correct?

Christopher Guerra

Yes, push to the branch name

Gentry

not seeing my push on github ... hmm

NOV 27, 12:18 AM

Christopher Guerra

You have to commit

NOV 27, 12:18 AM

Gentry

i see now

i got it now

Christopher Guerra

Cool

NOV 27, 12:27 AM

Gentry

yeah my first code and push look at me. Off to the races.

without fucking up main that is lol

Christopher Guerra

1

Lol, good start

NOV 27, 1:04 AM

Gentry

let me know when you start working on the GUI

@Sindhura Boppudi

NOV 27, 8:31 AM

Gentry

im working on the GUI

NOV 27, 12:56 PM

Sindhura Boppudi

Hi sorry I was working on it last night but didn't push anything

What did you do Gentry? I can work around that I don't want to redo whatever you did

Gentry

1

I pushed a lot. I may finish this Tomorrow

1

Take the day off

NOV 27, 1:05 PM

Sindhura Boppudi

Okay I'll check what you did first then push my stuff

Gentry

Ok push now, I'll pull and continue ill ne coding all day. I see me finishing this I got all the pieces just need to type

NOV 27, 3:17 PM

Sindhura Boppudi

Its not letting me push

Varika

Oh wait I frgt to push from yesterday will do

Gentry

im sure if it has to do with the GUI i have changed it many times over while your code sat there.

Christopher Guerra

You have to pull the changes and then push

It won't overwrite what you've done, but you might have to go through and look at all the changes made compared to yours

NOV 27, 3:25 PM

Sindhura Boppudi

Yea I tried merging but it was too confusing I'm just going to redo it later using Gentry's GUI, let me know when you're done working on it @Gentry

Gentry

ok

trying to connect to christophers database now or another one. cant seem to connect

Christopher Guerra

1

I have to start the server but I'm not done yet

How are you connecting to my database?

Or how are you trying to connecting

Gentry

This is the code im useing to try and conect to my database i built as a test, youre adress your go in the fields

```
import java.sql.*;
import javax.swing.*;

public class dbConnection {
    Connection conn=null;
    public static Connection dbConnector()
    {
        try {
            Class.forName("sqlite.JDBC");
            Connection
            conn=DriverManager.getConnection("jbdc:sqlite:C:\\\\Users\\\\thelo\\\\Des
kstop\\\\My Database\\\\myDataBase.db.sqlite");
            JOptionPane.showMessageDialog(null, "Connection to database
successful");
            return conn;
        } catch(Exception e)
        {
            JOptionPane.showMessageDialog(null, e);
            return null;
        }
    }
}
```

i need to make a class out of your database and change the directory to where ever your going

NOV 27, 3:37 PM

Christopher Guerra

You won't be able to connect remotely using just that, JDBC only works for connecting a local database or local network database to an application

In order to connect remotely you have to have a database that is connected through jdbc to a server application

Trust me I've spent days lookin at this stuff lol

Gentry

yea im trying to connect locally i cant even do that.

Christopher Guerra

Are you using Oracle Database 19c or what are you using?

Gentry

sqlight SQL

easy overlay for it

doesnt mater, you got a connection to your database ill just use that when your done. ill do other shit

Christopher Guerra

SQLlite has a slightly different format than SQLPlus. Not sure how it works in comparison

Gentry

i might have figured it out going to try something. i dont care if it is local we can pass it off as a company based program so it can be local. Just trying to get shit working lol

Christopher Guerra

I got my local connection working so if push comes to shove I can just buy a vga adapter

NOV 27, 3:48 PM

Christopher Guerra

1

I wouldn't worry about it too much just cuz this stuff is a massive headache

NOV 27, 5:27 PM

Gentry

going to go pick up my wife will be off for 2 hours or so. I took away all MY database stuff cause I couldn't get it to work. I have written code to connect with CHRIS's database communicator. I called my class 'Connection:"but needs to be changed to whatever you

have as your driver's name. Also,i put in a data check for the username and password that checks the value against the database but again I don't know the name so I used Communication. I think we need to put this all into one branch and delete the useless files. we need to get together and get names of variables and database locations to continue. other then that very small front end left to do other than security and fluff. be back in 2 hours.

oh and so far, I found no use for the "user" "password" branches just did all the front end on GUI branch. It should be fine.

NOV 27, 7:30 PM

Varika

Ummm no use for user? What do u mean. User has all the info about the user
The database check and all were all already in User and so is the names, passwords,
address and so on plus user class connects to product

Gentry

wasnt an attack on you, just hadent gotten there

Varika

1

hahah no! I didn't mean it was an attack on me lol I don't care I'm just saying I don't think it's a good idea to do away with it

NOV 27, 7:40 PM

Gentry

do we still need a "home" gui ?

NOV 27, 8:45 PM

Gentry

I see it

NOV 27, 9:46 PM

Sindhura Boppudi

Home is opening page

NOV 27, 10:44 PM

Gentry

I'm done for the night. Still need a few things on gui be back it 6am.

NOV 27, 11:09 PM

Noman Syed

It won't let me pull

NOV 27, 11:16 PM

Christopher Guerra

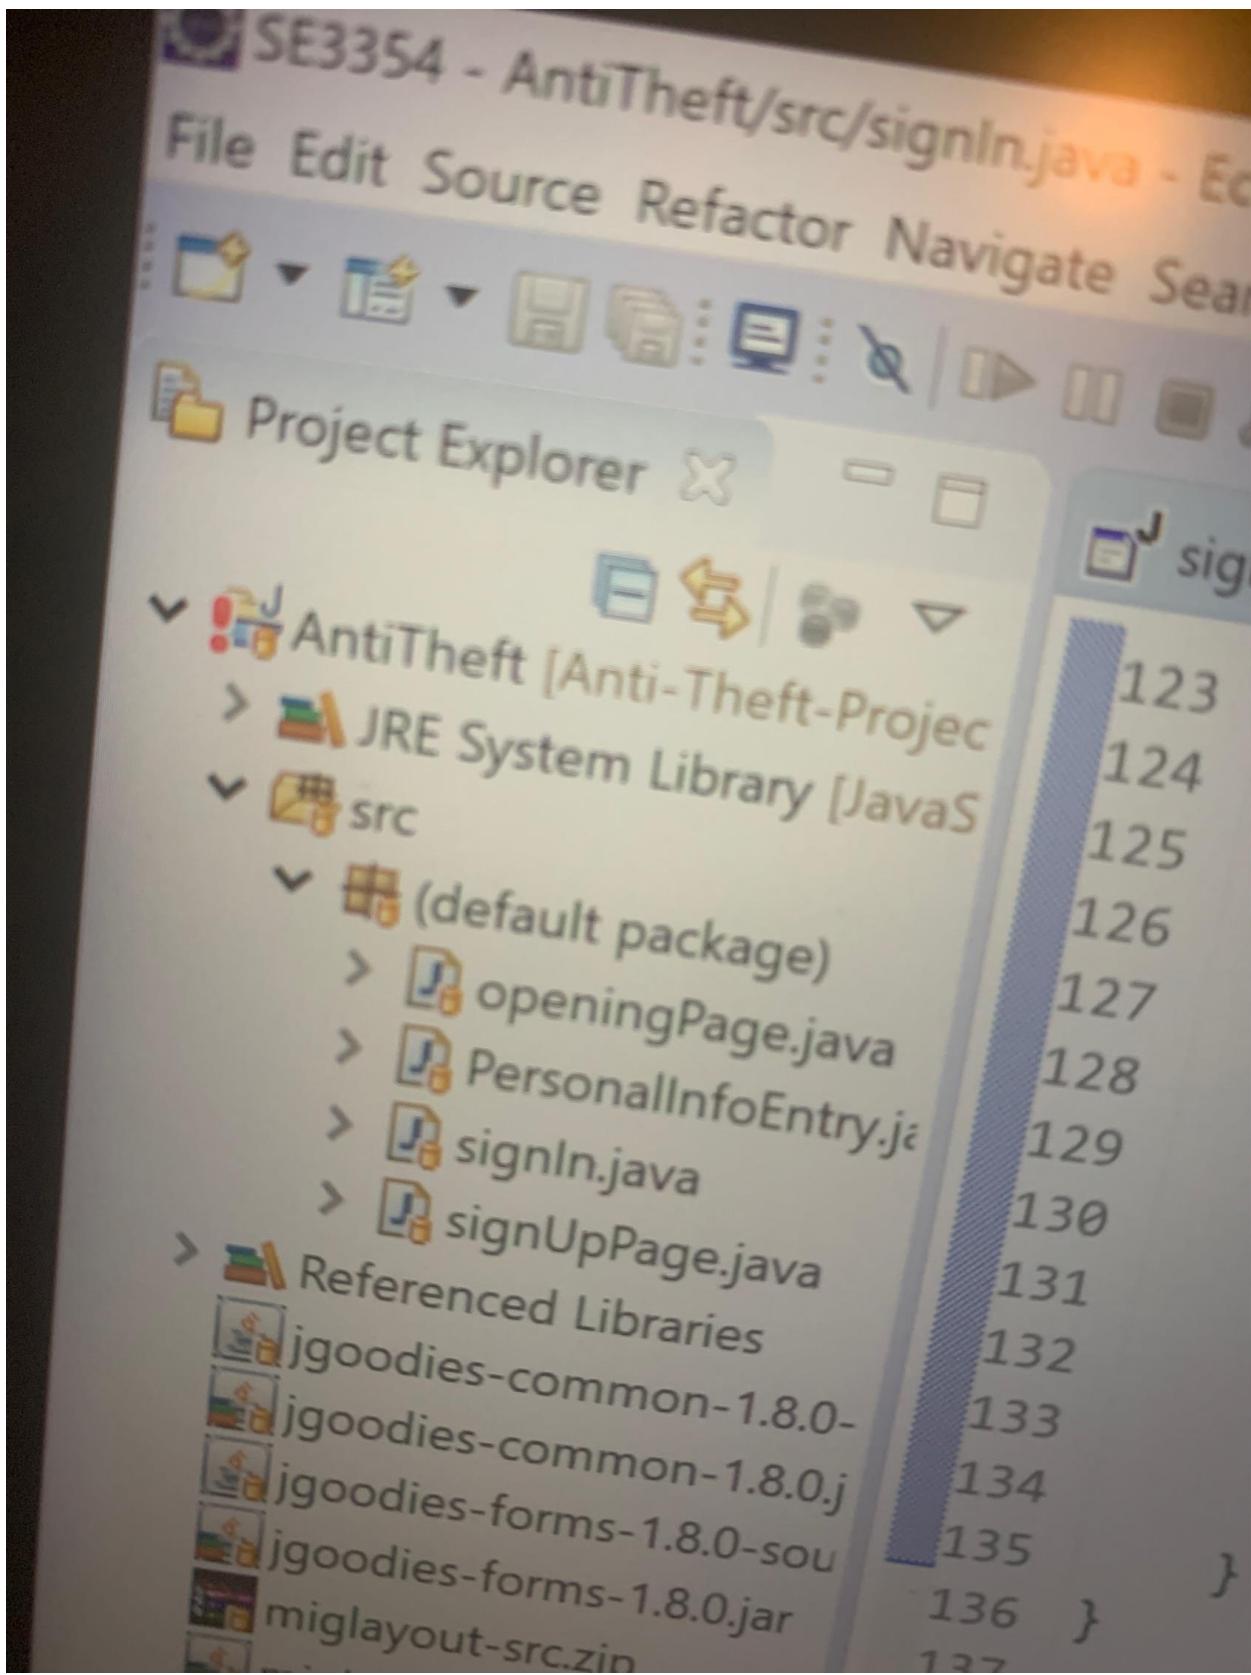

Did you make any changes?

Try committing any changes you've made first

NOV 27, 11:33 PM

Noman Syed

Why is there a red exclamation mark

Christopher Guerra

Check the problems tab at the bottom

Should say what's up

My guess is a build path problem

Noman Syed

NOV 27, 11:39 PM

Noman Syed

Yeah it's the build path

Saying missing required lib src/SQLite

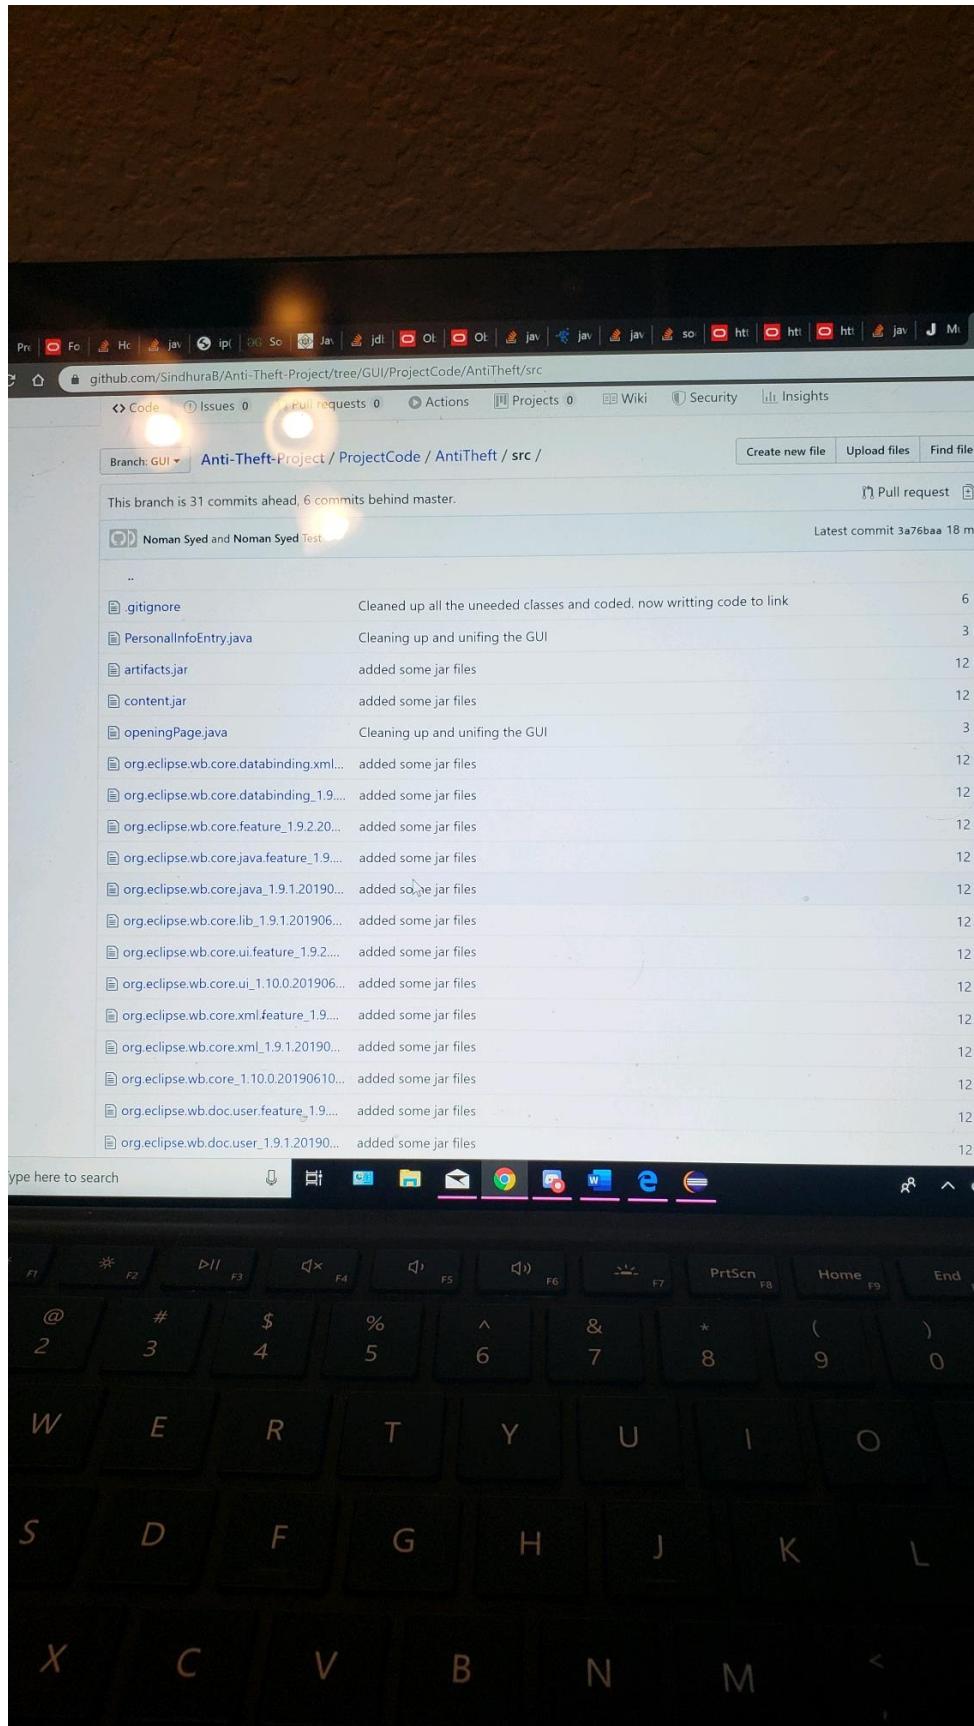

Do I need to merge ?

Christopher Guerra

Oh, Gentry must have referenced a library for using SQLite

I dunno what Gentry did but the repository is looking like this right now

Noman Syed

Should I re import the project ?

Christopher Guerra

That'd probably be easier, this looks real messy though

NOV 27, 11:51 PM

Christopher Guerra

1

I don't even know where to begin with all this man

Noman Syed

Lol

Christopher Guerra

Send me a pic of what you see whenever you reimport it

Noman Syed

I re imported it

And it still has the same issue

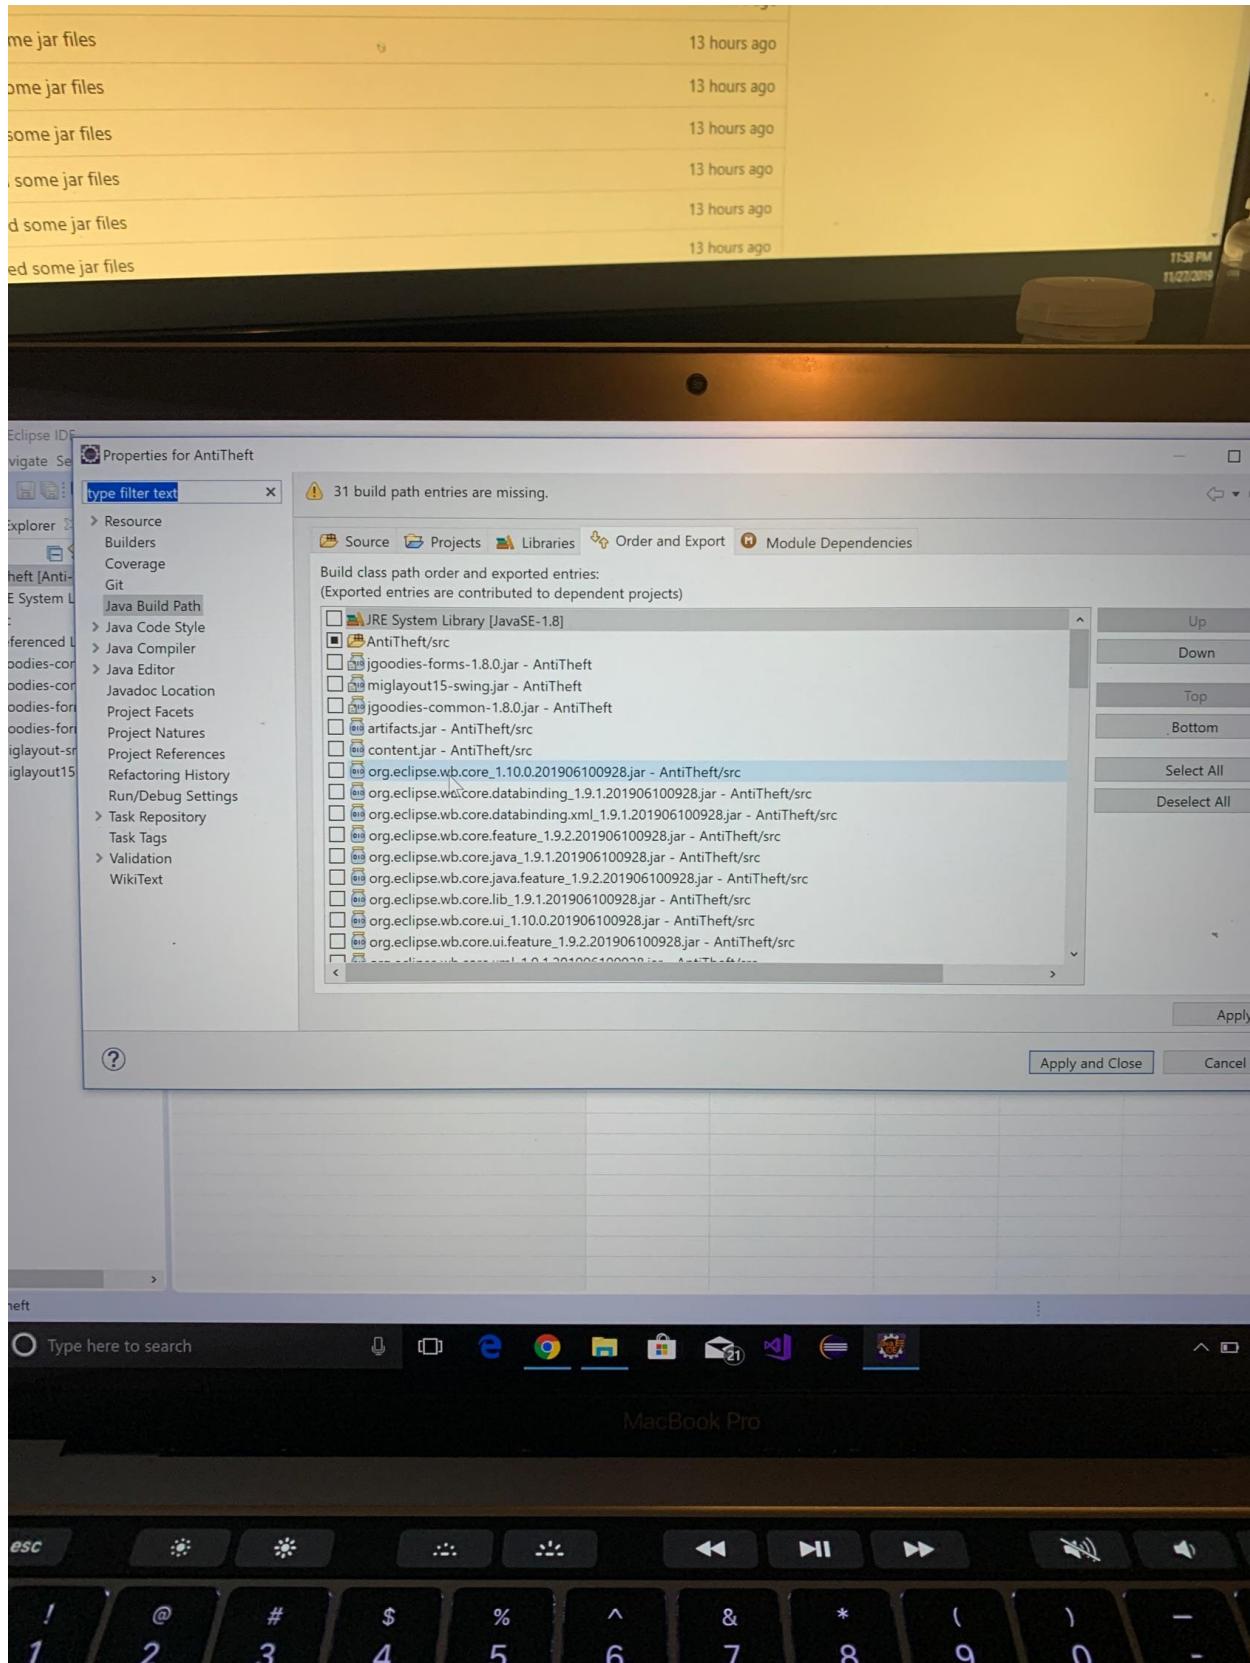

Christopher Guerra

Right click the project folder and go to build path -> configure build path

If there are any entries with red x's on them click them and then click remove

Noman Syed

Ok

Christopher Guerra

Holy shit he added way too many jar files
We don't need any of those
Their supposed to be referenced too, not directly put in the src folder

Noman Syed

How do you remove them there isn't an option
NOV 28, 12:01 AM

Noman Syed

Just says apply

Christopher Guerra

Click the libraries tab at the top
There should be a remove button now

Noman Syed

Okay got it to work

Christopher Guerra

What does the src folder look like?

Noman Syed

SE3354 - AntiTheft/src/openingPage.java - Eclipse IDE

Description

Christopher Guerra

Where are all the jars Gentry added?

NOV 28, 12:19 AM

Noman Syed

Under referenced lib

They aren't in src

NOV 28, 12:33 AM

Christopher Guerra

Ok cool, that's alright for now then

NOV 28, 8:56 AM

Gentry

That was a glitch, they can be deleted, they were suppose to be in gui reference but somehow glitched over to database in the code. Not sure how but they all can be deleted

NOV 28, 9:33 AM

Gentry

I'll finish linking the gui today and then move on to the "user"

NOV 28, 10:01 AM

Sindhura Boppudi

1

Can you let me know when you're done working on the GUI branch @Gentry

Gentry

Yup

Being honest, wife goes to work in an hour so I'm not starting until then.

NOV 28, 11:05 AM

Gentry

@Junior you on?

NOV 28, 2:20 PM

Gentry

@Sindhura Boppudi the GUI is 100% done in respects to it works and is all linked up. Still needs security checks and linking up with database to store or look up products but its all ready to be linked. going to start notes and j unit test.

Sindhura Boppudi

What is it linked to if not the database? Are you talking about the different pages?

Gentry

no i mean when people put in info for products it goes nowhere

NOV 28, 2:23 PM

Gentry

or log in goes no where atm

so you can log in with NO info if you want

i have some code ready but i dont know how we are linking it all up so the connection is correct.

is NOT correct

Sindhura Boppudi

Wait so I'm confused what are Noman and I supposed to do then if the GUI is done lol

Labeeba

Can y'all start writing the action listeners

So if someone inputs data it needs to go to the database

Gentry

there is PLENTY to do unfortunately

Junior

@Gentry I am out of town. I will get back to work on the project tomorrow or Saturday.

Gentry

@Junior np just wanted to tell you i combined your two pages to one

Junior

Ok

Gentry

yes we need the gui information to go where ever it needs to go i just made a shell that looks pretty and does nothing but go in circles

ill note it up and reorganize to so everyone can understand

Sindhura Boppudi

1

I can get started on the action listeners but if I'm doing it then I'll be expecting that only I'm (or Norman and I rather) doing it this time. We split up the work well initially but with so much overlap I didn't even get to push my work because another version was already created so whatever everyone says they're going to do let's just stick to that and finish it before going to other parts yea?

Christopher Guerra

I agree with that

Labeeba

Yes!

Christopher Guerra

Avoid any confusion and overlapping changes by sticking to a plan ya'll

Gentry

thats fine, i announced what i was doing and when, i didnt mean to step on anyones toes
but time is a sever factor

just let me know if you need me to get off GUI im just making notes

NOV 28, 2:42 PM

Gentry

2

im just trying to help get this project done so yall can do the holiday thing cause i have
nothing to do but get this done

NOV 28, 2:55 PM

Gentry

wife got offered 3x \$\$\$ to work, thats like \$75 an hour. so shes gone lol

NOV 28, 3:08 PM

Christopher Guerra

Damn that's some solid cash

Gentry

got to get that lol

NOV 28, 3:35 PM

Gentry

current version pushed still need few more notes, let me know if you get on GUI

NOV 28, 3:47 PM

Noman Syed

Is the final cumulative?

Gentry

I want to know that myself but I cant find time to study until this project is finished lol

Noman Syed

Should I email him?

Gentry

Sure

Christopher Guerra

He just released an announcement about the exam I think

NOV 28, 4:03 PM

Gentry

Is anyone going to work on the project today because I want to get the information in the typed into the gui to go somewhere, I also want the password to be checked. I will need help with this.

Christopher Guerra

I'm working on server connection. Not sure I'll be able to setup anything but a local network connection because I don't know of any API's that can hook it up to the internet

Sindhura Boppudi

1

I'm working on the action listeners

Christopher Guerra

If that's fine then we have a working server, just can't demonstrate it since we aren't all on the same network

Gentry

When you say action listeners you mean the buttons? Because they all have actions. I need the input lines to go somewhere

Every log in sigh in butting ho to the respective pages but without information being processed which is wrong.

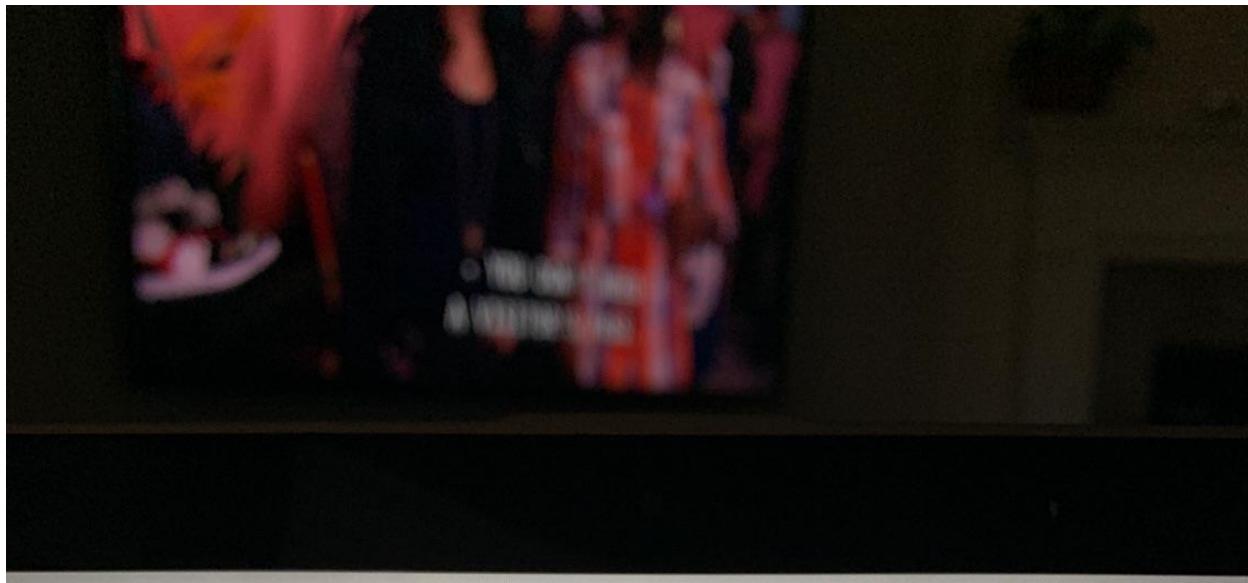

Sign*

Goes*

@Christopher Guerra will it connect to me or @Sindhura Boppudi so we can check the password of a user? Or only you?

Sindhura Boppudi

Anti-Theft-Project [GUI ↑2]

Does anyone know how to fix this? I keep getting this message when I try to commit

NOV 28, 4:11 PM

Gentry

Do you pull first?

Christopher Guerra

You'll have to implement the Database Querying class into your code, but you have to run the server on a local network

The server class is called QueryServer on the DatabaseQuerying branch

The client class which you'll need to implement when we merge is called DatabaseQuerying

Gentry

Saw that. Can we not combine these projects now to make one so all the files can work together?

@Sindhura Boppudi think your trying to push an old version. Pull first

Christopher Guerra

That's a large effort to do without verbal and visual communication so I'm not sure

Gentry

Well here is my stall. I got log in. They log in, that information goes to the database by database query and gets checks against each user to see if it exist. I got that code written but cant connect to your query because I dont know how.

I would love to get that working

Christopher Guerra

We need a call ya'll

I absolutely cannot explain this over text

Gentry

Truth. I'm down

When can u

NOV 28, 4:27 PM

Christopher Guerra

Gimme some time but I should be able to in an hour or two

Gentry

Ok I recommend anyone who can join to do so to make sure we are on the same page.

Sindhura Boppudi

1

I'm free till 6

Varika

Hey guys might be able to in an hour or two not sure but I do have just a quick question...to remove a product like on the front end, the user would click and it would go remove and all; but for the backend how would I do that? Like for the hashmap I need them to key in which exact product it is right to identify and remove it?

Gentry

Lost me, above my pay grade.

Varika

Also not sure who did this bit but since it's commented out are we safe to delete or are we returning to this section or using it somewhere else?

```
Window Help

    lastName = input1;
    String input2 = JOptionPane.showInputDialog("First Name");
    firstName = input2;
    String input3 = JOptionPane.showInputDialog("Middle Name");
    middleName = input3;
    String input4 = JOptionPane.showInputDialog("User Address");
    userAddress = input4;

}
*/
//Partners: Varika & Labeeba
```

Gentry

Not my work. I havent touched anything but gui.

NOV 28, 4:38 PM

Labeeba

1

I can get on too let's do a google hangouts call so we can screen share if needed

NOV 28, 4:59 PM

Gentry

Sign in - Google Accounts

hangouts.google.com

Whenever the time comes i set one up

NOV 28, 6:10 PM

Labeeba

I'm gonna get busy around 7:30 are y'all free to get on soon?

Christopher Guerra

I'll get on now

NOV 28, 6:16 PM

Gentry

Omw

NOV 28, 6:24 PM

Gentry

is anyone working on the project that isnt on the meeting ?

NOV 28, 6:34 PM

Labeeba

I'll be back

NOV 29, 9:52 AM

Gentry

3 days left.

NOV 29, 1:06 PM

Gentry

anyone want to try to work on this together today?

Christopher Guerra

I should be able to soon, I'll let you know

1

I've got like one alteration to make to my branch and then we can attempt to merge branches

Gentry

1

ok ill run erronds then get ready for that

NOV 29, 3:54 PM

Gentry

Let me know

Christopher Guerra

1

I'm makin my changes right now, also think I found a way to fix our internet connection issue

Gentry

That's amazing let me know when you merge we can get on a call and link the shit up

NOV 29, 4:07 PM

Christopher Guerra

For sure

NOV 29, 5:05 PM

Gentry

"We will check your team's Git logs to see what/when changes were made. It would be suspicious if a multitude of drastic changes were made during the last 24 hours prior to the Final Meeting."

Christopher Guerra

I've finished updating my branch, should be good to merge now

Gentry

please do,, do you need my help with that in any way

NOV 29, 5:08 PM

Christopher Guerra

I mean we still have a few changes to make but I don't think anything drastic will need to be done 24 hours before

Gentry

im just reading. we still got plenty to do but I cant move on i feel until i can see it work in the smallest fashion

Christopher Guerra

I don't think so, once I do it though all that needs to be done is link up my methods from QueryMethods.java

Gentry

sounds good

we got a report to write as well

You must have good automated tests for the majority of your code. We told you this earlier in the semester and we expect you to have them.

that was cut paste not me

Varika

1

I'm gonna write some Junit tests which shouldn't take long at all for the password branch later

Gentry

that would be amazing!

Christopher Guerra

Awesome

Gentry

might need your help in linking up this project and your part

Christopher Guerra

My methods return mostly string values by the way varika, so take a look at them if you want

Varika

1

yes same most user and product stuff actually return nothing sometimes but I found a workaround ish for string/void

Gentry

once chris gets all the parts in one spot we can follow the data path easier

NOV 29, 8:15 PM

Christopher Guerra

Server connection is working

Someone try running QueryMethods

Oh pull first by the way

NOV 29, 9:04 PM

Gentry

I'm put for the night I'll try in the morning

Please combine

NOV 29, 9:58 PM

Christopher Guerra

Server is confirmed working

NOV 29, 9:58 PM

Labeeba

1

Holla

NOV 29, 10:09 PM

Christopher Guerra

1

Here's how to fix this issue if you run into it in the future

Fixing main class not found error.docx (0.1MB)

NOV 30, 12:13 PM

Gentry

Did we combine yet?

NOV 30, 12:43 PM

Christopher Guerra

Not yet, I'm going to merge to the master branch but I wasn't sure whether to merge passwords or GUI with Database Querying

We could do both I suppose, @Varika you at a point where I can merge your stuff?

NOV 30, 12:56 PM

Gentry

I think it all needs to go into one project, then we can decide what is left over crap to delete. Then we can follow the data path. @Varika would be VERY helpful in this.

Varika

Hey yes u can merge but I haven't started working yet for today so I still wanna try those junit tests but everything is working and meets the requirements I think but I'll go over it once more to make sure; I can still do that after u guys merge right if u wanna merge now

Christopher Guerra

1

Yeah you can still work on it, you'll just have to do it in the master branch cuz that's where I'm merging everything

Varika

Sounds good

**Christopher Guerra**

Just make sure you say that you're about to hop on so we can work on it one at a time to avoid conflicts

Also delete any unnecessary files in your branches and make sure file names aren't conflicting between password and GUI because that's going to make merging hard
I don't wanna mess up ya'lls stuff so if you could do that for me that'd be awesome
Server is going to be down until tonight too because I'm driving home

Then I gotta set it up at home

**Gentry**

Gui should be clean and ready. Starts with main, goes from there.

NOV 30, 1:20 PM

**Christopher Guerra**

Aight, I'm about to merge stuff on the master. Varika needs to hook her stuff up and then GUI can be hooked up to the user class stuff

**Gentry**

Sounds good we will need to communicate at some point.

**Varika**

1

Hopping on rn to write tests

NOV 30, 1:43 PM

**Gentry**

I'm very worried about making it all work together.

NOV 30, 2:01 PM

Christopher Guerra

Yo Gentry what happened to the product listing page in your branch? I saw it under exclusions for build path for some reason

NOV 30, 2:04 PM

Christopher Guerra

Branches have been merged to master

Gentry

Because home page took over that

Christopher Guerra

Ph alroght

Gentry

Main-opening-login-homepage

Main-opening-signup-homepage

Homepage has product list and a place to put in a new product

Christopher Guerra

Pull the master and see if everything looks ok to ya'll

Gentry

Will when I get home soon.

Christopher Guerra

I gotta get goin soon cuz I have other stuff I need to do today

Gentry

So what you do put the server online as soon as your able so we can test

Christopher Guerra

Remember if there is a classpath problem refer to the word doc I put above

Yeah I'll make sure to do that part when I get back

NOV 30, 2:23 PM

Christopher Guerra

You and Varika and gonna have to work on hooking ya'lls stuff up together most likely

Gentry

Agreed. @Varika when u available?

NOV 30, 3:02 PM

Varika

I'm available rn!

Gentry

Getting on

<https://hangouts.google.com/group/a8mchCf18QW3ymYp7>

for talking and screen sharing

NOV 30, 3:13 PM

Gentry

pull before you get on i made 1 small change

NOV 30, 4:57 PM

Varika

@Christopher Guerra Gentry and I are working on linking things rn but he says u and I need to have a call to link stuff to the real database cuz rn we are doing mock stuff to check linking

Lmk when ur free later tonight?

NOV 30, 5:06 PM

Christopher Guerra

I was gonna do some orher stuff tonight, but linking it up should be pretty easy
Take a look at Query Methods and check out the return values of each method
Downloading and setting up stuff on my home computer might take a little while
But once it's done I'll let you all know and you can check out the return values yourselves
If you need any help let me know but I probably won't be available until tomorrow morning
The queries results that are returned from the database will return strings that you can parse into parts

The strings that are returned that need to be parsed are separated into parts by a straight line

NOV 30, 5:17 PM

Christopher Guerra

If you look in the main method of query methods then you can see some examples

NOV 30, 5:30 PM

Labeeba

Can someone pull and check to see if my JUnitConTest is popping up

I pushed it but it says rejected so not sure if it worked

NOV 30, 5:39 PM

Gentry

we are working on code

we announced it in the chat

we have been coding for hours

eer 39 min.. feels longer lol

me and @Varika are almost done linking up the gui to her workl, only need to find out how to display

we are on handouts if you want to join

@Christopher Guerra once we get done you and her will need to get together and make your two parts talk

1

@Labeeba dont see your code, if you want to push then let @Varika know so she can push and wait for your push

1

she is currently coding

Labeeba

Can you send me the hangouts link pls

NOV 30, 5:43 PM

Gentry

<https://hangouts.google.com/group/a8mchCf18QW3ymYp7>

NOV 30, 6:08 PM

Christopher Guerra

You have to push to your branch 1st then switch to master branch and pull from the database querying branch

But I wouldn't do it until Gentry and varika have committed their changes

Labeeba

I wrote it in the master branch

NOV 30, 6:15 PM

Christopher Guerra

Oh ok then that's aight

I thought you were sayin you had already coded it in Database Querying

Varika

So we've committed and linked everything except having trouble with displaying product list

NOV 30, 6:24 PM

Labeeba

Okay cool is it cool for me to push bow?

Now*

Varika

Yea ur good push what u have

Labeeba

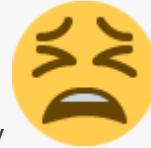

1

Ok sweet just did!

Varika

1

That was not 39 min that was 3 hours @Gentry
NOV 30, 6:34 PM

Gentry

i corrected my self lol

oh lol oops

hey found a problem

@Varika maybe YOUR problem you were trying to fix

i couldnt open the homepage in windows view because i had that wierd view you had of the java class and java file split.

so i re downloaded from GIT

and found NO page for you to display on .

its not there

NOV 30, 6:36 PM

Gentry

your files are not synced with git some how
i will correct, pull

Varika

Aaargh okay other than display everything is linked between us and working will resolve that tmr @Christopher Guerra i checked querymethods file can we have a call tomorrow to link I don't wanna change stuff randomly

Gentry

what is the user and password?

found it.. and guess what...

Christopher Guerra

Noice

Yeah we can have a call

Gentry

ok i got other shit to do until midnight but as soon as i can i will work on the GUI going to the middle of the screen and Junit test.

Great job today @Varika

1

@Norman Syed @Sindhura Boppudi we still need Junit test on GUI if you want

SUN, 11:02 AM

Christopher Guerra

Yo someone try to connect to the server

So just run quertmethods

SUN, 11:38 AM

Gentry

I'll do that in 30 when I'm home. Did you and V get together for the hook up?

Christopher Guerra

Not yet, @Varika are you ready?

SUN, 12:50 PM

Christopher Guerra

2

Don't worry about connection, I tested it using a mobile hotspot all is working

SUN, 1:49 PM

Labeeba

Has anyone started on the documentation by any chance?

Gentry

Nope.

SUN, 2:03 PM

Labeeba

1

Okay we need to have that done and also all the wikis updated

Gentry

Yup

SUN, 3:34 PM

Labeeba

Can I get everyone's gmails please? Sharing a google doc so we can all work on the documentation

Gentry

1

Thelocalgentry2@gmail.com

Christopher Guerra

1

chrisjamesguerra@gmail.com

SUN, 3:42 PM

Gentry

have we still not linked up the user to the database? cutting it close
also anyone working on it right now got a change i want to make in a bit

Christopher Guerra

I'm not working on it right now so go ahead

Varika hasn't gotten back to me yet

SUN, 3:49 PM

Junior

Hey @Christopher Guerra I am getting an error when I run it. Which doc were you talking about?

Varika

@Christopher Guerra Helloooo I'm here!

Christopher Guerra

Hold on gotta start the server

Noman Syed

Noman.replife@gmail.com

Sindhura Boppudi

Sindhurab1998@gmail.com

Christopher Guerra

1

Aight let's hop in a call real quick @Varika

Varika

vpinnam@gmail.com

Junior

juniorikamba80@gmail.com

SUN, 4:15 PM

Varika

@Gentry Hey the product display isn't working but u sent the photo yesterday and it works so maybe it's not pushed?

Gentry

hmm let me see

ok pushing now it works but im fucking with gui oppening page so its funky atm rejected

my page works so im going to cut and paste to make sure i dont lose

SUN, 4:25 PM

Varika

@Gentry Also can u add extension back in to sign up

Gentry

one sec

ok i pulled now it doesnt work.. what happened. it is now trying to connect to something it cant connect to

Christopher Guerra

I just pushed again sorry

Make sure you're running the right method

Gentry

i dont know what has happened to the code i had working, we had things good i dont know what happened but i saved all my code before i pulled so ill go through it and see what is different

it starts at main what is there to run?

at login it is looking for something that no longer exist , we set up a temp folder to check, not sure if you guys changed that to try to make it connect to the server but maybe we need to get on a call?

Christopher Guerra

Varika made a small change to homepage so she's going to undo it

Gentry

soo many errors to the pages that had 0 errors last night. sigh

Christopher Guerra

She probably pushed a file the implements query methods so it's attempting to connect to my server

Varika

We don't see any errors

Gentry

i got erroes on home page, rows, sighn in usertest
we need a call im stressed now

Labeeba

Yeah I'm getting the same errors
I pulled recently

Gentry

im going to go through each error see what happened

Varika

1

Gentry, just fix the product display in window builder the other errors we are working on linking to db so maybe that's why ur getting them hold on they might resolve

1

I have no errors

Also @Christopher Guerra says that we should still have input validation for sign up; I still have the code for it so just implement something in GUI that it doesn't move forward unless it's all validated

SUN, 4:39 PM

Gentry

ok ill look and see what part that is but i cant test it so

SUN, 4:46 PM

Gentry

ok fixed homepage i think pushed

how do i run from homepage so i can check

i know i need to run as configure but then what

Christopher Guerra

Make a call with varika because at ya'll are editing code at the same time, so you need to be careful

Gentry

i fixed one line, thats all

just an import

but need to check if it worked and i cant get to it to run it

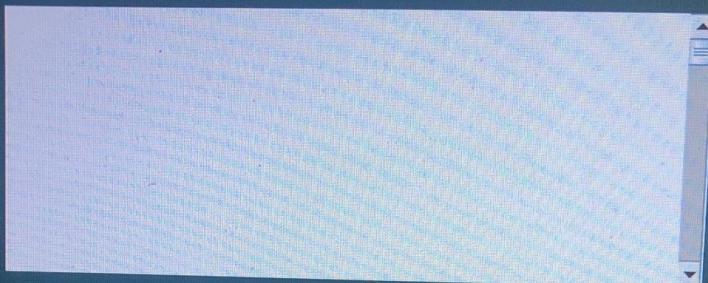

Varika

I still see the same homepage not the new one

Register New Products

Manufacturer

Item Description

[Sign out](#)

[Create](#)

ill let yall do what your doing let me know when your done.

Varika

Done db linked afaik

Christopher Guerra

You did it already?

Gentry

if you still have your files seperate as login.java, and log_in.class then that's a problem

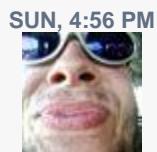

Varika

I have to test it but yeah I just replaced the methods we were using with the actual query methods

Christopher Guerra

Test the ones that don't create first

Christopher Guerra

Use the login info I have in the Query Methods example stuff to test getting account stuff

Gentry

push what you have please

Varika

Okay will do and also account creation and login works (I tested before ur msg)

I already pushed

Gentry

whats loging info ?

Varika

That's querymethods just for testing it's commented out currently

Gentry

im not sure what to do right now. I cant log in, because either you guys are not done, or i dont have log in info. I cant figure out how to run homepage seperate from main so i cant test the stuff i changed. So not sure where to go from herre

Christopher Guerra

Varika did you implement the shutdown server method cuz everytime I start it someone is connecting and then it shuts down

Don't implement that method

Varika

Oh it's there in the part u commented out that u told me test rn il comment that section out then

Gentry

Home page works, if your homepage doesnt look like this thats a problem because i have pushed it many times

Product List

| Item Name | Item Description |
|-----------|------------------|
| dwe - df | |

Register New Products

| Manufacturer | Item Description |
|--------------|------------------|
| dwe | df |

[Sign out](#)

[Create](#)

Christopher Guerra

2

Go ahead and comment out that whole main method in there

Gentry

lol its funny i get it working , then pull and there is a new error

SUN, 5:15 PM

Gentry

now it sais homepage is undefined lol

SUN, 5:25 PM

Gentry

do let me know when im able to use login

ok the new error i got in homepage is because of this line

```
public HomePage(String id) {
```

```
accID = id;
```

```
initialize();
```

was

```
public HomePage() {
```

```
initialize();
```

so ill let yall finish

SUN, 5:28 PM

Varika

Okay yes we need to pass the user id into home page

What does the error say?

Gentry

the actual error is at HomePage window = new HomePage(); and it sais undefined

to fix remove string ID later but then id gets messed off

Varika

okay when u do new homepage pass in the account ID into the constructor

I did that when u do sign in frame dispose new homepage; I didn't see u had called homepage elsewhere

Or define a default constructor without the id and that's fine too

If u tell me what line # it is I can do it but idk if my changes will get pushed to u

Gentry

but if i do that then the line accID=id doesnt work

want to call?

1

your changes get pushed to me, its my changes you are not getting
i think

Varika

Busy rn can't call but where is the new window line?

Gentry

44 is HomePage window = new HomePage(); the error
on homepage

Varika

Fixed u just have to pass the id into set visible as well so when it opens new window it has
the id

Gentry

push ?

Varika

Okay try now

Gentry

1

got it, fixed one closing bracket and pushed back
looks error free, let me see if i can get to it and try it out

SUN, 5:41 PM

Varika

Great if everything is working for u; go ahead and try to make a new account and add a product to db and all or add multiple and it should show all of them
I'm not able to test the GUI but all of that should work afaik

Gentry

whats the log in info?

when i try to run log in, i get servonnection error

Varika

make an account then log in

Gentry

ok

sign up no good

Varika

Show screen or dm me actually

Gentry

its here

```
QueryMethods.createUser(email, pass, first, mid, last, street,  
city, state, zip, phone, extension);  
frame.dispose();  
HomePage homeScreen=new HomePage();  
homeScreen.setVisible(true);  
JOptionPane.showMessageDialog(null, "Welcome Please register any  
new products");
```

Varika

Okay yes so after they create an account, take them to login page, because they need to sign in for us to get the account ID; don't go directly to homepage

After they login, same as sign in, the ID needs to be passed to home page i

Gentry

ok let me run this and see

ok its trying to connect to loging but the server isn't up at the moment

we will have to all get on a call some time

SUN, 6:00 PM

Gentry

@Christopher Guerra @Varika just let me know when we can get on a call, so we can finish this up

SUN, 7:23 PM

Labeeba

Can someone please get started on the documentation project description? I'm writing test code rn so I can't

Gentry

We don't have a working program.

Labeeba

Are y'all on a call rn or no

Gentry

1

Wish we were but nope

SUN, 7:32 PM

Gentry

1

I can get on the paper in about 30

Labeeba

Thank you until everyone else responds just go ahead and start that please so we have something to submit

SUN, 7:43 PM

Varika

I can get on the document in a bit

Gentry

@Varika shouldn't someone be trying to make the project work or are we needing chris?

Varika

I did what I can for that I don't know why it's not working I don't have what u pushed so I can't see why it's not working

On my end it's fine

Labeeba

Gentry maybe just delete and import again

Gentry

So your saying that the whole project works for you?

Does it work for anyone else?

Varika

Not the whole thing because like I said I don't have what you pushed with homepage

Gentry

@labeeba i have done that many times.

Is the home page on github my page or yours v?

Varika

Great question! I checked and home page on github is the one I have...meaning urs isn't getting pushed so I guess look into that?

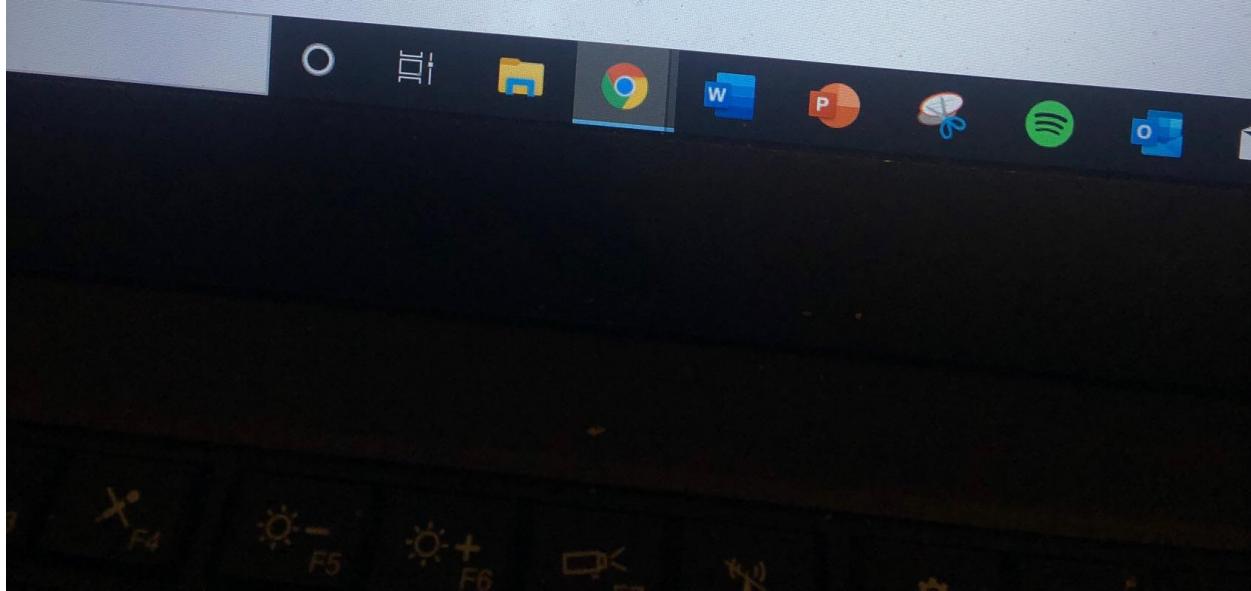

This is the bottom of the homepage on github rn

```
list.setBounds(280, 145, 447, 144);
frame.getContentPane().add(list);

btnCreate.addActionListener(new ActionListener() {
    public void actionPerformed(ActionEvent e) {
        String description = textField.getText();
        String manufacturer = textField_1.getText();

        QueryMethods.addProduct(accID, manufacturer, description);
        String display = QueryMethods.selectProducts(accID);

        list.setText(display);
        System.out.println("List displayed");
    }
});
```

Gentry

check again...at the top it sais revisions done BY me TODAY im pushing fine.

Labeeba

Maybe she hasn't pulled her

Yet*

Gentry

```
/**

 * Revisions 12/1/2019  
 *@authors Gentry Jenkins / Sin  
 *@version 2.2.0
```

@ labeeba does it work for you?

Labeeba

No I have a lot of errors rn

SUN, 7:57 PM

Varika

It's not about me pulling or not...the page on github..common to all...the bottom of it where the display happens is not changed

Gentry

im on github?

Varika

I'm talking about the bottom of the file the display part and if u want to collaborate, watch your tone.

Varika

I'm just reporting what I see. No one is attacking you so there is no reason to get all worked up.

I see that you pushed. I mean the bottom where we were working on the display yesterday? That part isn't working but I know it's working for you

Gentry

it was before the work on the database was done today.

i have NO way to check it anymore

Varika

No I mean the photo u sent above at 5:05 pm today that was after we did db work...if it's working like that for u which part of the code did u write to make it display?

Gentry

but am i correct in saying that you do not see this?

Varika

1

Nope. But all sign in and sign up is working for me. I don't have any errors. And no I don't see this homepage. So I really can't change or fix anything because from my end everything IS fixed

Bar the product display

Gentry

1

ok so what we need is a third party to see who is messed up i guess

Varika

Agreed so until then we can all just work on something else like documentation. Everything is fine.

Gentry

1

after we worked on what we worked on last night i had the same problem as you where your java and class files were messed up. I deleted the files and redownload the files from github and it all went away and has worked ever since. So i respectfully say that maybe if you still have that bug it could be the issue.

Labeeba

Yeah gentry don't worry about pushing anything rn and hop on the doc if you can

Gentry

@Labeeba can you please open home page in design view
sure np

SUN, 8:09 PM

Labeeba

I can't I have a lot of errors rn
Like it's physically not letting me run

Gentry

you dont have windows view do you

Labeeba

No but if atleast one of ours is working (varikas) I'm not gonna worry about it

Gentry

ok sounds good.

SUN, 9:50 PM

Christopher Guerra

2

I see no errors in the class files that aren't junit test

2

I dunno what's goin on with ya'lls stuff

SUN, 10:11 PM

Gentry

so yours works?

like you can run the program from beginning to the end?

because it wasnt errors that was the problem

SUN, 10:56 PM

Labeeba

What does the sign in button lead to

Trying to write the documentation

Varika

1

Fields to input Username(which would be email) and Password and it says Login or back button

SUN, 11:42 PM

Christopher Guerra

3

I made it through the whole app, a few bugs that can be fixed easily but all seems well

SUN, 11:48 PM

Gentry

That makes me feel better, make sure we have a display computer that we can use that is running it. Thanks @Christopher Guerra

Christopher Guerra

No prob, ya'll in a call?

We should be able to display from anyone's computer that has the necessary port for it

Gentry

no some people are doing the paper, im trying to work on centering the frames but i think im going to have to take a L on that part

@Christopher Guerra when i run, it stalls at database opening to check log in or sign in. So im not sure what i need to get it to go all the way through

Christopher Guerra

That's my bad, I gotta open the server up

SUN, 11:52 PM

Christopher Guerra

K, should work now

Gentry

its fine we can do that tomorrow ill be on campus at 930 am till class.

Christopher Guerra

I have an exam at 3 so I'm not sure I can do much tomorrow

Gentry
your push up?

Christopher Guerra
Yeah

Varika

@Gentry If u have time see if u can make the sign up page not move forward unless all the input is valid; I already have it written we just need ur end to not accept it

Gentry
i have an exame at 830
ill see whats up
is there a sign in and password i should be useing ?

Christopher Guerra
I'll put it in a doc and send it
Actually it's just Cool@cool.com and Cool123

Varika
sign up account creation it shouldn't accept gibberish so before we send all the info to the database we can send it to a method I have where it checks and u can do a pop up that says what's wrong

Gentry
it doesnt. It never loads homescreen

BMW, White i8

Action, Pool cue with slight chip on end

2, 2

Register New Products

Manufacturer

2

Item Description

2

Christopher Guerra

Please don't send too many create statements, it's going to fill the database with junk

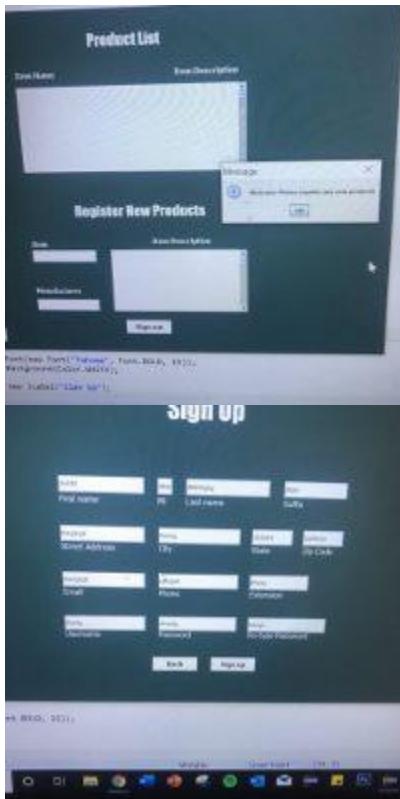

Gentry

ok

Varika

@Gentry this is what I mean...I put gibberish in for things that should be integers for example and it still let me make an account even ignoring the fact that the home screen display is wrong I just mean that it let me thru

But great to see that product display is working well!

Gentry

yes, and i am not trying to piss you off like i seem to be doing but we have different home pages. as we have discussed many times.

12:03 AM

Gentry

it may link up to your home page but not mine

Varika

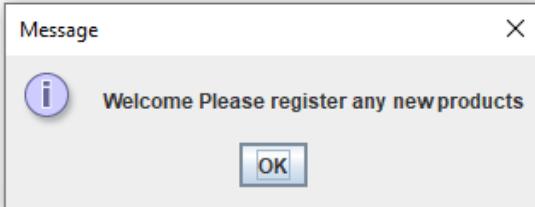

Sounds good! I just wanted to clarify cuz yesterday u said there might not be time to do

input validation so if u already did and it doesn't let u thru that's good

Gentry

Varika

I know the homepages are different lol I'm talking about the logic

Gentry

thats what i get when i create an account.
no home page

I understand, im trying to explain it brings up your home page for you, not for me.

Varika

okay when u make a valid account with legit info do u get *any* home page at all? Or is it
always that white screen?

Gentry

white screen on log up on log in i get to home page

1

i found the error trying to fix

Varika

Okay see that's wat I mean...regardless of what's happening with the server and u not
getting the right page on sign up... I'm talking about input validation..completely different
logic

Gentry

trying to fix

Varika

Okay good luck thank u

12:21 AM

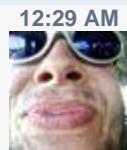

Gentry

```
String isvalid = QueryMethods.createUser(email, pass, first, mid,  
last, street, city, state, zip, phone, phone);  
if (!isvalid.equals("Invalid login info")) {  
frame.dispose();
```

```
HomePage homeScreen=new HomePage(isvalid);
homeScreen.setVisible(true, isvalid);
JOptionPane.showMessageDialog(null, "Welcome Please register any
new products");
}
else
{
JOptionPane.showMessageDialog(null,"The information is not valid");
}
```

this now gets me to a homepage but for some reason this path doesnt let me create on the home page weird

Christopher Guerra

isValid is not passed by createUser, login method passes the valid value

Gentry

```
String isValid = QueryMethods.createUser(email, pass, first, mid,
last, street, city, state, zip, phone, phone);
if (isValid!=null) {
JOptionPane.showMessageDialog(null,"Fill in all blanks");

}
else
{
frame.dispose();
HomePage homeScreen=new HomePage(isValid);
homeScreen.setVisible(true, isValid);
JOptionPane.showMessageDialog(null, "Welcomeh Please register any
new products");
}
```

this is getting me closer,

Christopher Guerra

Create user should only be called when a user clicks the create user button after filling out all the info and the entry info is determined to be valid

1

Please my database is crying

Gentry

ok ill stop but i dont know how to test if i dont test lol

Christopher Guerra

Well what you're entering is definitely getting passed to the database so I dunno what issues you're talking about

Gentry

i need to make a check to make sure that all fields are entered before continuation

Christopher Guerra

I'm getting messages with single digit numbers and stuff entered as values

Gentry

yeah im hitting 3 just to get by

Christopher Guerra

Aight

Gentry

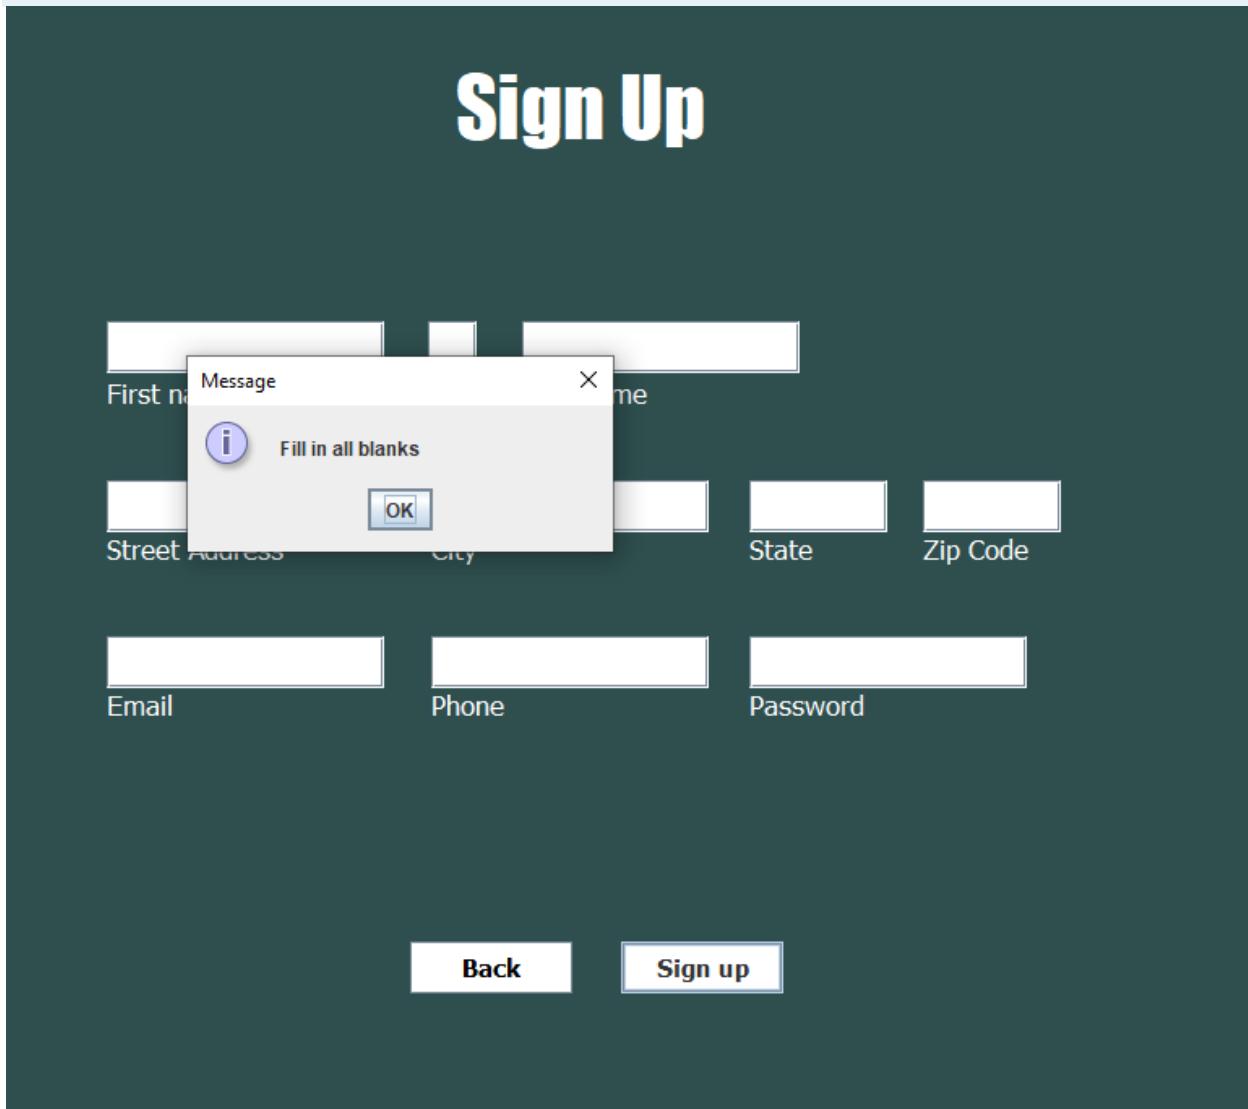

i got two more ideas to make it work , i changed the variable or i can be specific and say if email !null then dont move on

either way going through sign up doesnt let me create in the product but logging in does lol

can i test one more ?

ive gotten this far

1

if i can get it to pass with fields then im good

Christopher Guerra

That makes sense, you should go back to login screen to use the login info to login and then you can access your items and add more

Gentry

ok then ill send them login instead of homepage

Christopher Guerra

Use the login info use just created to login*

Gentry

can i send one more time?

Christopher Guerra

Yeah

Gentry

crap i cant get the catch down

ok im out of ideas. im just going to make it fall through for now

i guess log in works when the server is off?

no lol you can log in with no information, wrong information doesnt work but no information does lol

12:53 AM

Gentry

pushed my fixes. Didn't get the catch on the sign up.

Current bugs: log in can be empty/ signup has no catch/ home page only displays when a new item is made./ all pages open in the bottom right side. Couldnt fix.

all acceptable bugs, we can show a working program with what we have.

1:18 AM

Christopher Guerra

I'm getting information invalid when I input blank for log in

Gentry

good

Christopher Guerra

For updating the product list, call the getproducts class as soon as it opens

Then display right after

Getproducts method sorry

Does anyone want to make anymore code changes tonight? I'm shutting down server until tomorrow 9am

Gentry

im doing what you said right now one min

Christopher Guerra

Ok it'll be up for a lil longer

Gentry

log in working now ..weird

Christopher Guerra

Mighta been something I changed server side but I didn't change much

Gentry

Done and Done. Can you please delete 2,2 off cool

the item displays now as soon as home page pops up

im done

you can turn off the server, please delete 2,2 and (please delete this too) off cool.

we dont have a delete button lol

Christopher Guerra

Yeah I'll delete it lol

Gentry

but looks good other than i cant get those pics in the middle. Im looking for j unit test for gui now, its a bit harder because gui is private so you have to give permission to the test.

1:49 AM

Gentry

@Varika where does the sign up page send the info ?
user?

3:17 AM

Varika

no user was just the mock thing we did yesterday cuz we didn't have real db; it sends it to querymethods create user; i would prefer for it to send to user first so we can do input validation but since GUI doesn't support that it sends directly to query methods

5:53 AM

Gentry

1

i wrote something hard to test without database turned on but ill look later if i can figure it out

6:26 AM

Gentry

@Christopher Guerra for God's sake dont forget to get or do what ever is needed to make sure we have that beautiful DB you built for today.

9:02 AM

Christopher Guerra

1

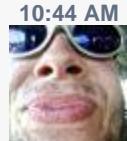

I gotcha lol, all is setup so don't worry

10:11 AM

Gentry

Morning folks, my first exam is over and I'm free until our class tonight. If anyone wants to get together for any reason let me know. Also anything we need that yall know of before I get looking?

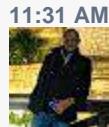

Christopher Guerra

1

Server is running if anyone wants to test the gui client

1

Also deleted that stuff you wanted gone

Junior

@Gentry where you at?

Gentry

Pool hall took a break lol

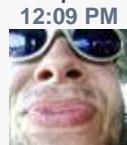

Labeeba

Is it okay if I push a junit test?

K I pushed

@Varika Are you gonna fix usertest.java and productjunit.java or should we delete them?

Christopher Guerra

If ya'll are entering empty fields into the data base it's not going to return anything or be entered into the db

Oracle db doesn't allow null values for unique variable such as username and password

That's only for the create user tho, nothing stopping you from entering empty info for items

That's something that should be checked client side anyway

12:32 PM

Christopher Guerra

If there is any unused code in the project make sure to delete it. This includes commented out code

12:46 PM

Gentry
